RE: Opposition to Certificate of Need-Cedar Recovery

Dear Health Facilities Commission,

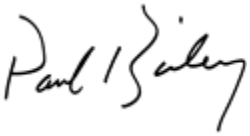
As State Senator who represents Putnam County, Tennessee, I oppose Cedar Recovery's application for a Certificate of Need and its proposal to establish a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee.

Putnam County, as a whole, has voiced their opposition to my office via email and telephone over the last several weeks expressing the fears and concerns they have.

I urge the Health Facilities Commission to carefully consider those concerns and reject Cedar Recovery's application for a Certificate of Need. Our community's health and safety depend on it and we must prioritize the overall wellbeing of the citizen's of Putnam County.

Thank you for your attention to this important matter.

Sincerely,



Paul Bailey

RANDY PORTER
COUNTY MAYOR

Re: Putnam County Mayor and Putnam County Commission
Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:

I am the County Mayor for Putnam County, Tennessee. I wanted to make certain that the Health Facilities Commission understands my position, as well as the position of Putnam County, Tennessee, as to Cedar Recovery's application for a certificate of need and its proposal to establish a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee.

I strongly oppose Cedar Recovery's application for a certificate of need and its proposal to establish a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I have informed Cedar Recovery that I have no intention of serving on any proposed Community Advisory Board for Cedar Recovery nor will any representative from my office. Furthermore, I have already requested that Cedar Recovery remove any reference to my office being involved with such.

I have safety concerns about the proposed clinic. Cedar Recovery is asking for certificate of need to place a clinic in the same building as a youth sports facility. Contrary to statements made by Cedar Recovery, the owners of youth sports business have tremendous concerns about the proposed clinic. The location of the proposed clinic is also within:

1,135 feet of a homeschool umbrella office
1,250 feet of a daycare
2,000 feet of Parkview School (an elementary school)
2,500 feet of a business park

Putnam County Mayor • 300 E. Spring St., Room 8 • Cookeville, TN 38501
PHONE: (931) 526-2161 • FAX: (931) 528-1300 • randy.porter@putnamcountytn.gov

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Putnam County, as a whole, opposes Cedar Recovery's application for a certificate of need and its proposal to establish a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. Enclosed with the foregoing letter is a copy of a resolution unanimously passed by the County Commission for Putnam County, Tennessee. The Putnam County community has voiced strong opposition to Cedar Recovery's application for a certificate of need. Citizen groups have held meetings to discuss such opposition. Currently, local citizens are circulating a position in opposition to the clinic in question which already has thousands of signatures. Lastly, it is our understanding that the Health Facilities Commission has already received a number of letters indicating opposition from residents of Putnam County as to Cedar Recovery's application for a certificate of need.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

Randy Porter

RE: Opposition to Certificate-of-Need
Methadone Clinic – Cedar Recovery

Dear Commission members:

I serve as the District Attorney General for the 13th Judicial District of Tennessee, a seven-county district which includes Putnam County. I write to advise the Commission of my strong opposition to the application of Cedar Recovery seeking to establish a methadone clinic at 1805 Burgess Falls Road, Cookeville, in Putnam County.

While Putnam County and my judicial district support recovery efforts, it has long been the position of this community to not treat addiction with another drug. I personally work with Recovery Courts in this judicial district and also refer those battling addiction to well-established treatment programs. This community has found great success in its' recovery efforts in programs that do not support the substitution of one drug for another. The proposed methadone clinic enjoys no support by community leaders in Cookeville and Putnam County.

I have concerns about such a clinic attracting drug-seekers from surrounding communities to Putnam County. Cedar Recovery is proposing to establish their clinic in close proximity to facilities serving children including a daycare center, an elementary school and Daniel 1 Academy, homeschool administrative office. I was personally present in a recent meeting, where Cedar Recovery representatives admitted that they expected that some diversion of methadone will likely happen at their proposed clinic

even though they make effort to prevent it. Our community does not see this clinic as a solution, but instead as an unwelcome additional concern.

I respectfully ask that the Commission decline to approve the application.

Sincerely,

Bryant C. Dunaway
District Attorney General

EDDIE FARRIS
PUTNAM COUNTY SHERIFF

RE: Opposition to Certificate -of – Need
Methadone Clinic – Cedar Recovery

Dear Commission Members:

I currently serve as the Sheriff of Putnam County, Tennessee. I have 35 years of law enforcement experience including being a Putnam County Deputy, Jail Administrator, Tennessee Highway Patrol Criminal Investigation Division Special Agent, Federal Bureau of Investigation Violent Crimes/Safe Street Task Force Officer, and as a Tennessee Bureau of Investigation Criminal Investigator. I am writing to advise the Commission of my strong opposition to the application of Cedar Recovery to establish a methadone clinic in Putnam County (Cookeville), Tennessee.

During my law enforcement career, 75% of my time has been dedicated to crimes related to illegal drugs. Most of which I spent as an undercover Agent for our state or the federal government. As expected, a certain portion of my cases involved wrongdoings by the clinics themselves, like the one in question. There were also numerous violations of criminal statutes or illegal drug related crimes committed by the individuals visiting the clinics. Some examples were buying/selling drugs in the parking lot before and/or after visiting the clinic. These individuals often sale the prescribed drugs to others or trade prescribed drugs for other non-prescription, illegal drugs; often keeping and using just enough before being tested at the visit to receive the next prescribed dose. The list goes on and on. One thing is certain, drug crimes lead to other crimes including violent crimes.

With this being said, as Sheriff, I do not want more crime in Putnam County. Furthermore, the citizens that know about Cedar Recovery Methadone Clinic strongly oppose it as well.

Now, I am sure there are certain specific individuals and times when prescribed methadone would be sufficient, however, I believe that amount would be a very small percentage and would not be a high enough volume to create a business for this type of clinic in our community. From my experience a large percentage of individuals that would be using this clinic would be from other counties and possibly even other states.

Safety concerns in the close, immediate area of the clinic would be extensive if the clinic was given a certificate of need. These safety concerns involve Daniel 1 Academy (home school), Home School Administration Office, Parkview Elementary School, as well as an authorized gun dealer.

I respectfully ask the Commission to give careful consideration to these concerns before issuing and granting a Certificate of Need.

From my experience, I have no doubt illegal drug crimes and possibly other types of crimes will occur if the clinic is permitted to operate. If this happens, I will use my experience and all my resources to address the clinic as well as any individuals involved. It is my oath to keep all citizens of Putnam County safe, and I will do so.

Thank you for your time and consideration in this matter.

Respectfully,

Sheriff Eddie Farris
Putnam County Sheriff's Office
Cookeville, Tennessee

RE: Cedar Recovery Methadone Clinic in Cookeville, TN

ATTN: Executive Director Logan Grant

Mr. Grant:

This shall be my personal letter to you to 100% adamantly oppose the approval of a CON for Cedar Recovery Methadone Clinic in Cookeville, Tennessee.

Putnam County DOES NOT want this clinic in our county. The community housed on South Willow Avenue / Burgess Falls Road absolutely 100% OPPOSES this clinic. There are not only multi amounts of family homes in that community, but businesses and a child care/recreational facility as well. This is absolutely the last place on earth that this clinic needs to be. This community in NO FORM OR FASHION deserves this clinic "shoved down" their throat.

I stand with Putnam County Sheriff Eddie Farris as well as other Putnam County leaders, in our 100% beyond opposition to this vile clinic coming to our county and this precious neighborhood.

Sincerely,

Wayne Nabors
County Clerk
Putnam County, TN

24 June 2024

Sirs:

I wish to voice my opposition to placing a methadone clinic in Putnam County.

The main reason for my opposition is that this clinic would be placing impaired drivers on an already busy highway.

Putnam County is growing at at tremendous rate and the highway infrastructure is already overloaded with congested traffic and the resulting traffic accidents. Adding just one impaired driver to this existing congestion is a recipe for disaster.

It doesn't make sense to me for the State to sanction the ability of a distributor to dose an already narcotic dependent individual with an intoxicating drug and then allow them to drive while they are impaired.

Please consider my strong opposition to placing a methadone clinic in Putnam County.

Sincerely,

Ken Hall
Putnam County Commissioner

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee

Request to Be Added to the Board Members' Packet

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder. This is what we need NOT a place where one drug can be replaced for another!

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is most certainly NOT wanted in our area.

I also find it deeply disturbing that Dr. Stephen Loyd, who has a remarkable story, oversees Cedar Recovery AND the Tennessee Opioid Abatement Council. How is this not considered a conflict of interest!?!?

Please note my opposition to this proposed clinic. Again, ***I urge you to vote against the Certificate of Need*** for which Cedar Recovery has applied.

Sincerely,

Kim Cravens
Putnam County School Board Chairman

Cookeville, TN 38506

Dr. Andrew J. Donadio
910 Franklin Ct
Cookeville TN, 38506

Dear TN Health Facilities Commission members,

I am writing as a concerned citizen and County Commissioner in Putnam County to express my concerns about the proposed clinic to be located at 1805 Burgess Falls Rd. Opioids are a huge issue in the Upper-Cumberland and I support the treatment needs of those affected by opioid use disorder. However, it is my sincere hope that the board will not find there is a need for this type of treatment modality in Putnam County. I acknowledge that the application submitted by Cedar Recovery likely meets many of the requirements set forth in the *State Health Plan: Certificate of Need Standards and Criteria*, but those criteria do not seem to consider the needs of the local community.

The people in my district have made their concerns and feelings known to me as their representation on the County Commission. I have received over 25 phone calls not to mention residents approaching me when I am in town and comments on my social media. Yes, some are in support of the work Cedar Recovery does, but the majority are opposed to this treatment facility.

I hope the concerns and desires of the residents affected will have some place in your deliberations as you consider the application of Cedar Recover.

Thank you for your time and attention,

Andrew J. Donadio, DNP, MSN, RN, MEDSURG-BC, CNE

As a Putnam County resident and business, I strongly oppose the Cedar Recovery at 1805 Burgess Falls Rd., Cookeville, TN 38501. We have many drug issues already. We don't need anymore. We are a small community and that building is right beside a sports complex, two churches and a daycare. You know what this will bring to the area. We don't need MORE addicts and drug sellers here. I feel for those that are addicted, but not to the expense of it killing one of my children when they are nodding off leaving the clinic. Please reconsider and oppose this coming to our community.

We have a community meeting tomorrow at Southern Hills Golf Course at noon. Our mayor and commissioners, who also oppose the methadone clinic, will be attending to hear our concerns for the 7/31/24 meeting in Nashville. I'd be glad to have someone there from the state and Cedar Recovery to hear our concerns. This has really upset our area.

> I am a retired chemist, so I am cognizant of the biochemistry of opioids. My wife is a retired registered nurse who has cared for a few newborns in withdrawal. We have

personal friends who have been addicted to opioids and have been “treated” with methadone. We also have acquaintances in the medical field who have worked with patients to overcome opioid addiction.

From our pragmatic points of view as a chemist and nurse, methadone treatment appears to be nothing more than exchanging one addictive drug for another. It is only a question of who profits from selling what drug. To a person, our friends have said being treated with methadone was as bad if not worse than being addicted to opioids. They all strongly favor faith-based or non-drug treatment programs. We believe their first-person accounts over favorably-packaged statistics. Our medical friends have hinted at perhaps the real motivation behind the proposed methadone clinic: a substantial profit margin.

Cedar Recovery had earlier proposed two locations for a methadone clinic. Their first choice, at the site of their current treatment clinic at 1225 S. Willow Ave., met with significant neighborhood opposition and drove the city to pass a non-exclusionary zoning ordinance. A representative of Cedar Recovery afterwards stated to a group of concerned citizens that a methadone clinic was “off the table” for Cookeville. Cedar Recovery then asked for a variance from the revised ordinance to be able to locate on North Oak Ave. Cedar Recovery next announced their intention to locate a methadone clinic at 1805 Burgess Falls Road, which is located in Putnam County (outside Cookeville city limits) where there are no zoning regulations. The building at this address currently houses a youth sports training facility, is across from a church, and lies approximately ½ mile from a new K-8 school campus.

We understand opioid addiction is a significant problem. We fervently believe, though, that there are better options than methadone clinics to treat people suffering from opioid addiction, including several vibrant programs already working in the Cookeville area. We vigorously urge you to deny the Certificate of Need for Cedar Recovery or any other methadone clinic in Putnam County.

Respectfully yours,

Gene and Marcia Mullins

***** This is an EXTERNAL email. Please exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email - STS-Security. *****

Good afternoon, I just saw the attached letter of intent for an opiate addiction facility to be placed at 1805 Burgess Falls Rd, Cookeville, TN 38506. See attached. I live just 1 mile from this address. It is a very heavily a residential area. A facility like this will cause property values to fall. The city of Cookeville just gave Cedar Recovery approval to put in a facility in the city in the medical district so I don't understand why it would want to choose this location which is industrial and residential other than they are trying to get around city zoning and building requirements. This address has a child day care within a mile of it. There is a new elementary school being built that is only a few miles away and there is a child sports complex next door in the same building. This is the kind of place that will draw drug addicts who will be in close proximity to children. I fear putting this type of facility in this location will endanger children's lives. I oppose this application.

Thanks

Subject: [EXTERNAL] Opposition to Cedar Recovery Certificate of Need in Putnam County

Dear Tennessee Health Facilities Commission,

We are writing to express our strong opposition to Cedar Recovery's application for a Certificate of Need for a "nonresidential substitution-based treatment center for opiate addiction" at 1805 Burgess Falls Road in Cookeville, TN.

I am a retired chemist, so I am cognizant of the biochemistry of opioids. My wife is a retired registered nurse who has cared for a few newborns in withdrawal. We have personal friends who have been addicted to opioids and have been "treated" with methadone. We also have acquaintances in the medical field who have worked with patients to overcome opioid addiction. From our pragmatic points of view as a chemist and nurse, methadone treatment appears to be nothing more than exchanging one addictive drug for another. It is only a question of who profits from selling what drug. To a person, our friends have said being treated with methadone was as bad if not worse than being addicted to opioids. They all strongly favor faith-based or non-drug treatment programs. We believe their first-person accounts over favorably-packaged statistics. Our medical friends have hinted at perhaps the real motivation behind the proposed methadone clinic: a substantial profit margin.

Cedar Recovery had earlier proposed two locations for a methadone clinic. Their first choice, at the site of their current treatment clinic at 1225 S. Willow Ave., met with significant neighborhood

opposition and drove the city to pass a non-exclusionary zoning ordinance. A representative of Cedar Recovery afterwards stated to a group of concerned citizens that a methadone clinic was "off the table" for Cookeville. Cedar Recovery then asked for a variance from the revised ordinance to be able to locate on North Oak Ave. Cedar Recovery next announced their intention to locate a methadone clinic at 1805 Burgess Falls Road, which is located in Putnam County (outside Cookeville city limits) where there are no zoning regulations. The building at this address currently houses a youth sports training facility, is across from a church, and lies approximately ½ mile from a new K-8 school campus.

We understand opioid addiction is a significant problem. We fervently believe, though, that there are better options than methadone clinics to treat people suffering from opioid addiction, including several vibrant programs already working in the Cookeville area. We vigorously urge you to deny the Certificate of Need for Cedar Recovery or any other methadone clinic in Putnam County.

Respectfully yours,

Gene and Marcia Mullins

My name is Jennifer Lafever. I am opposed to a clinic here because. If they take 3 pills a day. When they get their meds they are to take all 3 doses at once. Which then they are let go to drive the streets like a drunk driver. It is not safe for them or for anyone else meeting them on the road. I have seen what it does to a person when they take all does for the day at once.

Dear Sirs:
I strongly object to the proposed placement of a Methadone clinic in Cookeville or any part of Putnam County TN.
Please take this clinic, Cedar Recovery, out of Putnam County. I do not relish the crime and addicts it will draw into my town. It just swaps one addiction for another at a profit and the doesn't address getting the person off drugs at all.
Please reconsider and do not let the Certificate of Need pass.
Humbly,
Karla McKinney

Subject: [EXTERNAL] Cedar Recovery- Putnam County

Good evening Mr. Grant,

I am writing as a private citizen of Putnam County. I strongly oppose the methadone clinic looking to operate in Putnam. (Cedar Recovery) The location proposed has no available walkway from any geographical location. There are tight turns in the road and no room for someone to safely walk or bike on the road. This with the physical state of the clientele they wish to "treat" will lead to numerous injuries or deaths.
The proposed location is thirty feet away from a youth sports development facility which my daughter currently attends. I will stop having her attend this sporting business if the methadone clinic is put into operation for her safety. I have worked in the health care field previously and know the safety dangers of these clinics first hand.

Thank you for your consideration on this matter and keeping our community safe

Dear Logan,

I am vehemently opposed to the proposed methadone clinic in my county. I moved from Wa. State to get away from the crimes created by methadone clinics. Please vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee.

Please read this link regarding methadone clinics:

https://link.springer.com/article/10.1007/s11292-018-9347-1?fbclid=IwZXh0bgNhZW0CMTAAAR08cfmqfnwez8EqBKAjVYZSn-xzIr5YyJLBX8aN5dJwy517HUQMhllgvv4_aem_X_vcrYUtOfaGZxqlX2wRlg#citeas

Results:

WITHIN A 200 MILE RADIUS, THE PRESENCE OF AN OUTPATIENT MATHADONE MAINTENANCE TREATMENT FACILITY CAUSES A SIGNIFICANT DECREASE IN PROPERTY AND TOTAL CRIME BUT A SIGNIFICANT INCREASE IN DRUG AND VIOLENT CRIME. THERE ARE NO SIGNIFICANT EFFECTS ON CRIME OUTSIDE OF THE 200 MILE RADIUS. THE EFFECTS OF AN OUTPATIENT MATHADONE MAINTENANCE TREATMENT FACILITY ON PROPERTY, VIOLENT, AND TOTAL CRIME DECREASES WITH THE INCREASING DISTANCE FROM THE OUTPATIENT MATHADONE MAINTENANCE TREATMENT FACILITY, CONSISTEN WITH A CASUAL EFFECT.

Sincerely,
Adrienne Mack

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.
While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility,

and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a “drop” for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility “where they are not wanted.” With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.
Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,
Amanda J. Allison

Subject: [EXTERNAL] Opposition to Cedar Recovery Methadone clinic in Putnam County and surrounding areas
Date: Friday, June 28, 2024 1:12:04 PM

Health Facility Commissioners,

I am a resident of Putnam County as well as a concerned father. I am opposed to the proposed methadone clinic, Cedar Recovery as well as its location; less than 50 yards from 2 churches, a preschool, metal working industry and directly next door to a youth recreation facility. The proposed location is also 100 yards from a thriving neighborhood where children still go outside and play in the streets. To place a facility in this location where they dose individuals with a mind altering narcotic and proceed to release them into the public to operate vehicles or roam the streets is both reckless and irresponsible.

I am well aware of the opiate epidemic that has swept the nation and I do want to see individuals receive the help they so desperately need, however, I know that a methadone clinic is not the way to address this issue for many reasons.
Firstly, giving an individual an addicting, mind altering, mind damaging drug to help them stop using an addicting, mind altering, mind damaging drug is not the answer. Studies have proven that methadone can cause damage to brain tissue which causes a plethora of negative side effects such as, learning and critical thinking delays, slower reaction time, walking and balance issues as well as heart and respiratory problems.

Putnam County currently has 11 addiction therapy programs that do not dose on site and release intoxicated individuals into the public to drive vehicles under the influence. On top of this safety concern, one of the administrators of Cedar Recovery admitted in a recent meeting that there is no way to prevent the bathrooms within the facility from becoming a "drop zone" for patients and there would be no way to prevent patients from selling methadone in the parking lots to non-patients, effectively turning the location and surrounding area into a hot bed for drug deals and crime. The administrator also claimed in this meeting that they would not place a facility where they are not wanted. With this email, I am informing the board that a methadone clinic is not wanted in Putnam County or the surrounding areas.

Please consider this plea. Place yourself in the shoes of a father with two young girls who drive these roads daily and ask yourself what you should do. Please consider the safety and well being of the local population who do not want this facility in our area. Cedar Recovery methadone clinic is not needed nor welcome in Putnam county or the surrounding areas.

I ask that you note my opposition to Cedar Recovery's proposal and include this email in all member packets. I ask you sincerely, please vote against the Certificate of Need for which Cedar Recovery has applied.

Thank you for your time and consideration,
Boyd Sasser

Honorable Earhart,

I respectfully request that you vote NO on July 31st for Cedar Recovery's certificate of need for Putnam County .

The proposed location is within walking distance to my house as well as many elderly neighbors. We fear for our lives with 12 counties of drug addicts being bussed in daily. They could walk to our house!

There are other proven methods for drug addicts. We don't need a methadone clinic in Cookeville TN. Representatives from Cedar Recovery stated in a recent meeting that they will not go where they aren't wanted. Cedar Recovery is not needed or wanted in Cookeville TN. Please vote no on July 31.

Request to Be Added to the Board Members' Packet

Attn: Tennessee Certificate of Need Commission:

As a resident of Putnam County, Tennessee, I am writing to express my strong opposition to the proposed Cedar Recovery (CR) Methadone Clinic planned for my county. In public meetings CR Chief Medical Officer Stephen Loyd and Chief Strategy Officer Paul Trivette have put forth three principle claims about their proposed facility: 1) Methadone prevents overdoes and provides recovery, 2) Putnam County has a great need for a methadone clinic, and 3) CR wants to be a positive force in Putnam County.

As to the first two claims:

From an overdose aspect, Putnam County has the lowest overdose rate of the seven counties surrounding Putnam (0-30 per 100,000 residents-- Source: Tennessee Department of Health, Office of Informatics and Analytics, Drug Overdose Reporting System YTD 2023).

Methadone is an addictive drug that the National Institute on Drug abuse recommends a minimum 12- month usage. North Carolina's Urban Survivor Project Coordinator Abbey Coulter touts she has been on methadone for 20 years. These examples highlight methadone is a substitute of one addictive drug for another. It is misrepresenting recovery at the mildest assessment.

Putnam County currently has five treatment and recovery facilities for drug addiction. In fact, CR already has an opioid treatment center in Putnam County. With CR currently operating 12

addiction facilities with Tennessee, one must question what level of market saturation is sufficient.

In addition to their treatment facilities, Putnam County's Share of Opioid Abatement money has totaled approximately $700,000 for 2023 and 2024 (source Tennessee Department of Health). The payout of these abatement funds will continue for 18 years. For 2024, the abatement monies were disbursed among 11 different agencies to address opioid addiction.

In summary, methadone may reduce overdoses. It should be considered where overdose numbers merit additional medical options. Methadone should not be touted as a recovery. It is a perpetual mode of addiction that allows addict functionality. Putnam County has an abundance of addiction treatment and recovery facilities already, and the county has continued resources to sustain treatment options.

As to the third claim:

Chief Strategy Officer Paul Trivette asserts that CR will be "positive force" in the community. CR made multiple attempts (3) to get the city of Cookeville to rezone areas to accommodate their medical facility. City of Cookeville complied and enhanced zoning regarding clinic location proximity to schools, churches, daycares, playgrounds, and parks. When CR was unable to secure city property compliant with zoning, they hopscotched to the county where "no rules" existed for a facility such as theirs. CR's resistance to reasonable rules and understandable resident concerns for safety and security is alarming, at the least.

The attendant prospect for drug related crime and violence is real. I have failed to find any literature or interview with law enforcement whose first-person experience with methadone clinic operations who said crime was not an element attendant to that business. A study published in the Journal of Experimental Criminology (2020) sought to quantify location-based crime in relation to methadone clinics. Study results revealed a statistically significant relationship between drug related violent crime and facility location.

In conclusion, CR's repeated attempts to locate in a community that clearly does not need or desire the facility by attempting to circumvent zoning, safety requirements, and citizen's reasonable concerns is not a "positive force" of any kind.

I sincerely hope the Certificate of Need Committee does not allow CR to move forward in Putnam County.

Sincerely,

Cindy Jarvis

Subject: [EXTERNAL] Certificate of need for Cookeville Methadone clinic
Date: Tuesday, June 25, 2024 7:31:28 PM

Dear Sirs,

I am a resident of Cookeville TN. I am writing to express my concern and opposition to the proposed methadone clinic at 1805 Burgess Falls Road.

This clinic is within 2000 ft of 3 churches, 1 day care center, 1 gun store and within ½ mile from a middle school.

The proposed location is also within a ½ mile of multiple high density residential neighborhoods that will require additional county sheriff's patrols.

Burgess Falls Hwy is a 2 lane highly traveled route with little need for increased traffic without additional turning lanes and improvements

I believe considering the above list of reasons, a more suited location should be chosen.

My last plea is "Would you want a methadone clinic 1/2" mile from YOUR home?"

Sincerely,

C.W. Pointer

Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:
I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.
While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:
1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,
David Adams

Subject: [EXTERNAL] Proposed Putnam County Methadone Clinic

Dear Mr. Earhart,

I am a resident of Putnam County, Tennessee, and am reaching out to you regarding the proposed Methadone clinic on Burgess Falls Road in my county. I understand that you are on the board that will be deciding whether to approve Cedar Recovery's Certificate of Need.

I understand that there is an opiate addiction problem in our state, but I do not believe that a methadone clinic in Putnam County is the answer to this problem. From the experts at a local meeting regarding this issue, it appears that methadone clinics can create more problems than intended.

In regards to a location within the Upper Cumberland region, there are already a number of non-substitution-based treatment groups that know our communities and the best resources to reach those with opioid use disorders. There is also a great concern regarding the proposed building for this clinic - located within a youth sports training facility, plus located less than 1/2 mile from a homeschool office, daycare facility, and middle school.

One of the administrators of Cedar Recovery spoke at a recent meeting in our county, reporting that there is no way to prevent the bathrooms from becoming a "drop" for patients of the clinic, and that there would be no way to prevent patients from selling methadone rather than using this drug as a treatment for themselves. Further, Cedar Recovery administrators have stated that they would not locate a facility "where they are not wanted."

Please consider this email as my opposition to this proposed clinic. Putnam County does not have a need for this proposed methadone clinic. I ask that you vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,
Denise Sessler

Dear Sir,

I am writing this email to express my opposition to a Cedar Recovery Treatment Methadone clinic coming to our county. This will bring even more homeless drug addicts to our area. We already have plateau mental health on Willow and a mental health homeless van catering mostly to homeless and drug addicted staffed by firemen coming to Cookeville. We do not need to incentivize planting roots in Cookeville if you are a mentally ill drug user . Understand that if is this clinic comes here, our way of life will degrade and our town will change for the worse.

Date:	Tuesday, June 25, 2024 9:13:15 PM

Dear sirs,

I am a resident of Putnam County, Tennessee. I am tremendously concerned and opposed to the proposed methadone clinic in my county.

I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville Tennessee.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in out county is the proper way to address the issue. Furthermore, the proposed clinic in out is extremely problematic for a number of reasons, which include but are not limited to the following:

1. Methadone has been linked in medical studies to brain tissue damage that can cause leaning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.
2. Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.
3. The Upper Cumberland Region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.
4. The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a home school umbrella office, and within 0.5 miles of a middle school and elementary school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in out county that there is no way to prevent the bathrooms in such a facility becoming a “drop” for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities.

Further, the administrators of Cedar Recovery stated to an audience at a meeting in out area that they would not locate a facility “where they are not wanted.” They weren’t wanted in Rickman or Overton and with this letter, I am informing this that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.
Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,
Jessica Dille

Clare Erewhon hsda.staff@tn.gov

To whom it may concern;

My wife and I are residents of Putnam County, TN as well as property and business owners at 1767 Burgess Falls Rd and 2139 Burgess Falls Rd. We are writing to you today in sincere opposition to the proposed methadone clinic just 2 doors down the street (at 1805) from our residence and business at 1767 Burgess Falls Rd and just up the street from our business property at 2139 Burgess Falls Rd.

Our residence there is a gathering place for our children and grandchildren, our customers at both locations are largely women, women with children or senior citizens who commonly use our facilities at all hours. The safety of our family and customers is our primary concern, the community and our neighbors are as well. There are many reasons to deny the clinic a permit including multiple churches, two schools, a daycare facility, several residential areas surrounding the site with thousands of homes and this is certainly not an appropriate locale for a medical facility of this type.

South Willow Ave and Burgess Falls Rd are inadequate for the current traffic load becoming clogged every morning, noon and evening. Adding traffic that is not familiar or even drug impaired is a recipe for more congestion and even more accidents.

The chosen location is barely outside the city limits. This is an issue due to zoning in the city that Cedar Recovery would like to avoid by coming to the county but remain so close to the city limits in an area that is bound to be annexed soon that they get accepted / Grandfathered into the city. Once an annexation takes place, they will receive the benefits of city services without having to meet code for the city. This clinic is not about the need, not about the children and not about the addict. It is simply about the money irregardless of the cost to the community.

Property rights, property damage and values in the area will all be put at risk as will public safety. Drug users regularly fund their habit and life via crime. Drug users regularly associate with other drug users even going to rehab and probation meetings together. It is not just the "patient" we are concerned with but also the people they associate with. We see time and again where ever these "clinics" appear so does vagrancy, trespass, litter, property damage, panhandling, assault, theft and even breaking and entering.
We believe trading one addiction for another is a fool's mission since at best you still have an addict. We must change minds and hearts not drugs. The path to reducing addiction is to remove the substance not legalize and permit an equally bad alternative. We have several family members that work in various healthcare positions and none of them agree with the methadone clinic approach and most condemn the idea that adding an addiction is a good thing. We have family and friends in law enforcement that all agree, the only numbers that go up is crime when a methadone clinic comes in.
Not in my community!

Please join the people of Putnam County, the property owners, the small businesses and their customers, the churches, schools and daycare of our community in telling Cedar Recovery, "Not Here".
Businesses cluster by category or types for a reason. Light industry congregates with similar business as does retail and service industry businesses as does medical services. These clusters form out of common needs, convenience and efficiency If you believe this to be a legitimate

need then there are much more appropriate locations that are zoned accordingly.

Please note our complete opposition to this proposed clinic in our community. We urge you vote against the permit for Cedar Recovery or anyone else.

Sincerely,

John R. and Tammie Nash

Subject: [EXTERNAL] Proposed Clinic in Putnam County
Date: Saturday, June 29, 2024 1:01:08 PM

To whom it may concern:

As a resident of Putnam County, I strongly oppose the proposed methadone clinic in my county. I have many concerns regarding this clinic, and I am writing to you as a private citizen to urge you to vote against the application for Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, TN 38506. I request that you add the following letter to the board members' packet for the hearing as to the application.

The proposed clinic is problematic to our area for a number of reasons, including, but not limited to, the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within ***0.3 miles of a daycare facility, and within 0.5 miles of a middle school.***

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a “drop” for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility “where they are not wanted.” With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

Jonathan Smith

24 June 2024

Sirs:

I wish to voice my opposition to placing a methadone clinic in Putnam County.

The main reason for my opposition is that this clinic would be placing impaired drivers on an already busy highway.

Putnam County is growing at at tremendous rate and the highway infrastructure is already overloaded with congested traffic and the resulting traffic accidents. Adding just one impaired driver to this existing congestion is a recipe for disaster.

It doesn't make sense to me for the State to sanction the ability of a distributor to dose an already narcotic dependent individual with an intoxicating drug and then allow them to drive while they are impaired.

Please consider my strong opposition to placing a methadone clinic in Putnam County.

Sincerely,

Ken Hall
Putnam County Commissioner

Logan and Phillip,

As a resident of Putnam county I want to express my opposition to the proposed Methadone clinic on the Burgess Falls road. As a citizen of Putnam county I am urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville Tennessee.

These for profit opioid drug clinics do not help drug addicts or the communities they peddle their addictive drugs.

Cookeville, Putnam County and the entire state of Tennessee has no place for these pharmaceutical drug dealers. Instead of helping addicts to break their addiction they simply offer a pharmaceutical legal substitute that addicts continue to suffer under. They profit and push highly addictive prescription drugs. Instead of helping people get off of drugs they add to the user's list of drug options. They are evil drugs dealers and no different than the illegal drug dealers pushing cocaine, meth, pot, fentanyl, oxy-drugs sold on the streets.

It is bad enough we have doctors who prescribe this poison, but to set up an entire 5+ million facility to peddle life long addictive drugs and draw in addicts from across the state is not something we need in our community. Setting right off of I40 is only going to bring in drug trafficking transits and increase drug dealing to our community.

My home is less than a ½ mile of this proposed methadone drug dealer facility. I have lived and paid taxes in Putnam County for the past 20 years. Somehow the city zoning council found a way to change the zoning laws and push this trash right on their city limit boundaries. So instead of doing their job to keep our community prosperous and safe, they side with drug dealers and push this trash onto the county residents. I find their actions shady and disgusting. And now I am learning that we have tax payer funded grant money involved, that is even more disgusting.

This addictive drug dealing facility is right in the middle of Prescott elementary and

middle school, Daniel 1 homeschooling, daycares, churches, multiple family sub divisions, and right in the middle of our natural tourist area route. This will be the first thing people will see driving to our tourist areas in the community. Property values will plummet and crime will grow were it currently does not exists.

People live in Putnam County because it is not too big of a city and not to small. We love our clean, low crime, family friendly community. This Methadone clinic is something I have personally witnessed in Portland, Detroit, Chicago, Denver, Seattle or San Francisco. These places have nothing but evil industries in place to condone and enable homelessness, drug addiction and mental illness. Many communists states like California, Illinois, Michigan, Washington and Oregon are collapsing due to these type of self destructive evil drug dealers conning the local community that they are "here to help". Methadone clinics are a community cancer. What they are doing is no different than offering an alcoholic a vodka instead of whiskey. They continue to enable the addiction, no cure it. But what is even worse and more evil, they profit from this just like the illegal drug dealers do. Tennessee does not need to support, finance or condone “legal” drug facilities in our state.

We already have addiction facilities available to addicts who need help. Places addicts can go get off of drugs rather than keep them addicted.

The administrators of Cedar Recovery stated at our local meeting that they would not locate a facility “where they are not wanted.” I am telling you that Cedar Recovery and their proposed methadone clinic is NOT WANTED in Putnam county, in our area or in Tennessee period.

Please vote against the Certificate of Need in which Cedar Recovery has applied. There is no need for them in our area and again, they are NOT WANTED.

Kim Kirby

Mr. Earhart,

Just sending this because of the proposed methadone clinic in Putnam county. My family and I are opposed to this happening. Methadone clinics are a bad thing and I can speak from experience. I was on methadone for 10+ years. It's a nightmare on it and to come off of it. Anyway again we are against this clinic being put 2 miles from my house as it will bring nothing positive to the county.

June 26, 2024

To Whom It May Concern:

My name is Shannon O'Neal, and I reside in the Pembrooke Pines Subdivision of Cookeville, Tennessee. My home is located less than five minutes away from 1803 Burgess Falls Road, the same location that you wish to create a methadone clinic. As an extremely angry resident of Cookeville, at no time do I want a methadone clinic in my town.

In September, I will be 40 years old, the same age that my mother was when she passed away unexpectedly. An autopsy report revealed that her cause of death was cirrhosis of the liver. However, she also was taking oxycodone prescribed to her for back related problems at the time. Though I didn't live with her at the time, my brother did. After her death, he described to me her misuse of painkillers. He observed her take handfuls of oxycodone and wash it down with a coffee mug of vodka. Before she began her misuse of painkillers, she already

was in poor mental health, had extreme anger issues, and was a nonexistent mother. Her issues were only exasperated when she began taking painkillers. At the age of 18, I was a freshman in college, living with my father, and was supposed to be having some of my happiest times. I was left with not just an absent mother, but a dead mother. I was left wondering how we will even pay for her funeral? Those should not have been my worries. That time, stole from my present and my future as I was on the cusp of entering adulthood and making major life decisions.

That part of my life is now in my past. I live a very happy and peaceful life that I fought like hell to achieve. I am happily married, have two college degrees, and work as a teacher in a neighboring county. I thank God and my family for what I now have. The purpose of my personal story is to show that I know the first hand effects of having a loved one addicted to painkillers and its horrible aftermath. I also never want to relive any of my past or expose anyone else to that way of life.

Additionally, I have had the great privilege of living in Cookeville for four years. I am incredibly blessed to live in a place filled with beautiful, talented, and hardworking people. Our town has people with good hearts that come together in times of need. Our town takes pride in the way it looks, the opportunities it affords, beautiful scenery, fine dining, award winning schools, and more! I am proud to be a resident of Cookeville, and want to keep our town at its finest. A methadone clinic is at no time welcome in our town that so many have fought to

build up. It would increase crime, destroy property values, and most importantly, will put our residents in harm's way.

Thank you,

Mrs. Shannon O’Neal
Cookeville, Tennessee Resident

Good Evening,

I am writing to encourage anyone who can to DENY the certificate of need for Cedar Recovery in Cookeville on Burgess Falls Road. This is the same building a youth sports center is currently in. Parents are able to drop their children off here, let them practice sports and pick them back up. This would no longer work if this happens. Our children deserve a space to be kids.

This is also right beside a daycare and incredibly close to 2 elementary schools and 1 middle school. It's also a road I travel each day with my 2 daughters.

Please keep our children the #1 priority and deny this.

Thank you for your time.

Subject: [EXTERNAL] Methadone Clinic

To whom it may concern,
As a retired licensed alcohol and drug counselor, I've treated numerous methadone clinic participants. Some talked about the abuses of methadone they saw outside the clinic. Others stated that they had a counselor at the clinic but no treatment plan of gradually getting off methadone was discussed. Some were pregnant and were advised to stay on methadone till the birth. Of course that meant the baby would be born addicted. Studies show babies born addicted to Methadone have significant neurological delays and lower development evaluations.
Putnam county has many facilities for treating addictions where at the end of treatment they have no drugs in their system and can participate in IOP and self help groups to remain stable.
WE DO NOT NEED A METHADONE CLINIC IN PUTNAM COUNTY.
Sincerely,
Ann Nothnagle

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

5) Cedar Recovery has failed to communicate adequately, timely, and or fully to this community in Putnam County about the need for a Methadone clinic. They have failed to demonstrate how they will safeguard the surrounding area from potential criminal activity

especially some of their clients who may have a criminal history. We will hold Cedar Recovery and the State of Tennessee responsible for their clients actions even if not on the premises. **Example: If a Cedar Recovery client is provided a methadone dose, then gets into a vehicle as the driver they are impaired, just like someone who ingested alcohol. Note this location does not have public transportation to accommodate all 12 counties they are trying to serve.**

6. Cedar Recovery has not to our knowledge provided who the physician will be overseeing these clients. Are they onsite or Telehealth only, referred but not directly managed by a physician. A detailed plan of care for these clients must be communicated to the all residents of Putnam County. Methadone can be sold and clients will be provided a small supply of methadone to take home, which from many law enforcement agencies experience and statistics reflect a strong possibility the client will sell their supply of methadone for quick cash, possibly to young people in our community who haven't had access to such strong and addictive drugs.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of theclinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic.

Again, I urge you and all board members to vote against the Certificate of Need for which Cedar Recovery has applied.

Respectfully,

Request to Be Added to the Board Members' Packet

Dear Mr. Logan Grant:
I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.
While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:
1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of theclinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Subject: [EXTERNAL] Cookeville Cedar Recovery Clinic

Dear Logan Grant,

I am sending you this letter to oppose allowing Cedar Recovery or any other methadone recovery clinic to be brought to our community here in Cookeville, TN.

We have NO NEED for any drug recovery clinic, as we already have several rehab and recovery programs in place to take care of our community.

Cookeville has real solutions that work for us and they keep our county and it's people safe with high recovery rates. These programs get people off drugs with great success.

Simply replacing a drug for another drug with no cut off time, is a slow downhill spiral for everyone involved, including the state. People HAVE to want to truly change in order for any program to be successful. This would include a sense of self worth, being accountable for their actions and being a contributer to society. You cannot ACT supportive by handing them a drug, when we humans need so much more!

It would be wise if the state of Tennessee would think differently than states like California, Washington, Oregon, Colorado and several others whom already have these types of clinics, syringe safe house handouts and other money driven programs. There are many ways to make people responsible for their own lives. Allowing these companies and clinics to come into our state to keep addicts hooked on drugs is letting a robber come into your home to steal, more criminal activity will come. Just look at the states that are doing these things. Where is the improvement?? You don't need stats to see that it's not truly working. Aren't we supposed to be decreasing drug use? Why then are we allowing it to increase?

Do the right thing and find REAL solutions to help these people, like we have. Throwing another drug at them is NOT the answer.

Thank you for taking the time to read this letter, and I hope that you will be patient in reading several more.

A concerned Tennessee citizen,

Zerada Thomas-Morgan

Mr.Earheart,
I want to ask you ”please do not allow this clinic in our county”! Methodone is no answer for anyone struggling with addiction. We have programs here to help our citizens who are struggling and the last thing we need is a clinic who is going to administer another addicting drug to them.
There is no need for this clinic to be in our county. We do not want this clinic here so please vote No!

RE: Opposition to Certificate of Need - Cedar Recovery Methadone Clinic @ 1805 Burgess Falls Rd., Cookeville, TN
Request to Be Added to the Board Members' Packet

Methadone itself IS an addictive drug as it's a legal form of 'meth'. Police officers will tell you it brings in criminals when they know a 'methadone clinic' is here. The only ones profiting from this are the people investing money into opening a clinic like this!

Cedar Recovery is NOT welcome in Cookeville, TN.

Sincerely,
Diane Barker

Dear Tennessee Health Facilities Commission,

SUBJECT: OPPOSED TO A OPENING A METHADONE CLINIC IN PUTNAM COUNTY

We are strongly opposed to opening a methadone clinic in putnam county. We are not opposed to programs helping people free themselves of their drug addictions. We have a lot of faith based and other treatment programs in our community. We do not believe such facility should be located in our residential neighborhood. This proposal site has a high traffic rate already, close to churches and one school. We feel we already have many programs here to help people who truly want to get off their addiction. We Oppose this plan totally.

Thank you,

Dear Sirs:

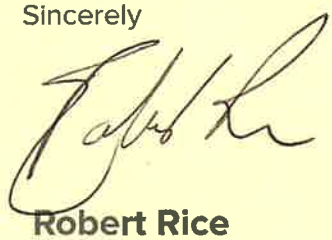
We strongly oppose the plan to build a Methadone clinic in Putnam County.

There are much better resources for people to get help for addiction without fattening the wallets of For Profit Drug Dispensaries like the one planned..

Such a clinic would do irreparable harm to the citizens of Putnam County bringing drug traffic and related crime to the area.

If you study the situation, Methadone is the wrong solution to cure the Drug addition problem. Studies have proven that the only benefit of a clinic like this is producing profit for the investors involved in the scheme. This is based on facts and not hearsay . Political pressures from the wrong direction have caused this process to make the drug problem worse. PLease don't be part of the problem.

Sincerely



Robert Rice

Dear Tennessee Health Facilities Commission,

SUBJECT: OPPOSED TO A OPENING A METHADONE CLINIC IN PUTNAM COUNTY

We are strongly opposed to opening a methadone clinic in putnam county. We are not opposed to programs helping people free themselves of their drug addictions. We have a lot of faith based and other treatment programs in our community. We do not believe such facility should be located in our residential neighborhood. This proposal site has a high traffic rate already, close to churches and one school. We feel we already have many programs here to help people who truly want to get off their addiction. We Oppose this plan totally.

Thank you,
Brad and Heather Thomas

Jumping Jelly Beans Daycare

1710 Herbert Garrett Road Suite B

Cookeville TN 38506

931-341-9332

Dear Representative:

As a resident of Cookeville in Putnam County, a concerned citizen, business owner, and parent, I am writing to ask for your support in blocking Cedar Recovery of Middle Tennessee, LLC from building a Methadone clinic near our facility. This would cause a loss of business due to safety concerns for the children in our care.

While I believe in addicts receiving treatment, I do not believe this location is the safest location for our daycare, Elite Sport Training, and Daniel One Academy who all serve children daily on the same road as where the projected location will be. Specifically, our daycare is located 0.3 miles and a short seven-minute walk to where the Cedar Recovery Clinic is planning to develop their Methadone Clinic. We serve 99 children between the ages of 6 weeks to 5 years. From my understanding this clinic will be an Intensive Outpatient Program including prescribing Methadone, a schedule II drug, to not treat but curb the craving of opioid addiction including Heroin. These types of drugs are not only abused but also sold illegally to others who are addicted and seek individuals out in these programs to buy it on the street.

An article by SAMHSA stated, "SUD IOP programs may provide services to those mandated to treatment by the criminal justice system (e.g., for driving while intoxicated). Programs may also serve individuals transitioning from incarceration back to their community or those who agree to attend IOP treatment in lieu of serving out their remaining sentence." Our daycare is located facing the Dollar General, so this causes into question if these drugs will be sold illegally at the front of our facility in the parking lot after receiving their refill. Our children at multiple times during the day are outside on three different playgrounds located on our property. Would you want your child or grandchild attending a daycare where foot traffic from potential convicts with aggressive tendencies or worse sex offenders would have access to being near your children? Neither do our families in concern to the safety of their children and what they will be exposed to if this isn't stopped. This could cause my daycare to lose business and reputation as a safe facility for children in the community to attend.

Our state priorities need to reflect this knowledge and take into consideration what crime this Methadone Clinic could cause near our children. This community needs a quality safe daycare more than it needs another Methadone Clinic for recovering addicts. I urge you to not support this establishment being able to be so close to these young children. Thank you for your time and consideration of this request. Your support of keeping our children in this community safe would best serve this Methadone Clinic not being put in so close where we are located.

Sincerely,

Jumping Jelly Beans Daycare Administration

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

Norm and Sandy Sorensen

Dear Sir,

I'm am a resident of Putnam County and I'm strongly oppose the opening of a methadone clinic in Putnam County. This proposed clinic will disrupt and harm our community. Putnam County does not need a methadone clinic for the following reasons; 1) we have other licensed recovery programs already in place in Putnam County and don't need a for profit methadone type clinic that provides no medical/psych treatment to addicts, 2) research shows that this type of clinic will lead to an increase in crime and make the community less safe, and 3) this proposed clinic is adjacent to a youth sports facility, less than a quarter mile from a daycare center and two churches. This clinic is an attempt by an unscrupulous healthcare company to exploit a federal program for money, while providing shoddy and poorly supervised care. This treatment practice has a poor record of achieving any successes and numerous cases of worsening the addicts medical conditions.

Putnam County does not need or want a for profit methadone clinic and I strongly oppose the county and/or state government approving any such action and will vote accordingly.

Thank you for including this letter in opposition to Cedar Recovery of Middle Tennessee, LLC., efforts to open a methadone clinic in Putnam County.

Sincerely,

Chuck Mateyka

Re: Request to be added to the board members' packet - Concerning Opposition to Certificate of Need - Cedar Recovery Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee.

Dear Board Members:

I am a resident of Putnam County, Tennessee. I am very concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote **against** the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add this letter to the board members' packet for the hearing regarding the application.

I understand that opiate addiction is a problem in our state, but the proposed clinic in our area is problematic for several reasons, which include but are not limited to the following:

1) Venture capital investor's view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

2) The Upper Cumberland region has several non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

3) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

It is my understanding that one of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in the facility in becoming a "drop" for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is **definitely not** wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote **against** the Certificate of Need for which Cedar Recovery has applied.

Sincerely,
George E Morse

Re: **OPPOSITION TO THE CERTIFICATE OF NEED – CEDAR RECOVERY METHADONE CLINIC – 1805 Burgess Falls Road, Cookeville, Tennessee**

***Request to Be Added to the Board Members' Packet**

Dear Esteemed Board Members and Other Interested Parties:

Thank you in advance for your attention to this letter. As a private citizen and resident of Putnam County, Tennessee, I am extremely concerned, even to the point of sleepless nights, about a proposed methadone clinic in my county. I strongly urge you to vote **against** the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I respectfully request for the foregoing letter to the board members' packet for the hearing as to the application.

As a resident of this beautiful, small community, I pray that you vote to deny Cedar Recovery's certificate need request. The methadone clinic in our county, in my humble opinion, is not the proper way to address the issue. I humbly ask that you do what is right for this small community and its needs and the best path forward when you consider the request. Even the County Commission for Putman County unanimously passed a resolution opposing the Cedar Recovery clinic request, with many of our esteemed doctors and counselors agreeing that methadone is not a good long-term treatment option for a recovering addict. With that being said, the reasons for my respectful appeal for your denial of the Certificate of Need, includes (but is not limited to):

1) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic. Will the investors and Cedar Recovery be required to add sidewalks from Willow Avenue near Highway 40 to and from the clinic on the narrow, vehicle-only traveled country road leading mainly to residential areas? The proposed location does not provide sufficient road space for a bicycle, pedestrian, or any other form of transportation other than a motorized vehicle (car, motorcycle, etc.) able to go the speed limit (45 mph). Will the citizens of Putnam County be able to hold these investors liable for adverse

effects to their property, health, and safety? If allowed to open, the investors must be held accountable for damages to Putnam County residents, including nearby property values.

2) We support those who need our help with fighting addiction in many different ways and already have several quality local treatment options available. The Upper Cumberland region actively seeks to help residents overcome opioid use disorder and currently provides care to those who are actively pursuing a non-substitution-based treatment within our communities.
3) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.
4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school. These types of clinics often lead to other criminal activity which we don't want in our community and certainly not near our youth.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "**where they are not wanted.**" With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely **not wanted in our area**.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need.

Respectfully,

Frank Morgan
5625 Dogwood Dr.
Cookeville, TN 38506

Dear Mr. Phillip Earhart,

This letter is my voice stating that I oppose the opening of the proposed Methadone clinic in Putnam County. There are already other programs in our community that treat and support addicts which give a better chance to rehabilitate (faith based, hospital, counseling, rehabilitation groups and other medically supported programs, etc.). I believe the NEED for this clinic has not been established or proven and we already have several options in place that have excellent results.

I'm a retired Deputy Sheriff who has seen other communities degrade from Methadone clinics that were instilled into the public. Crime has increased, property value decreased, intoxicated addicts have roamed the neighborhood and streets. Very sad for law abiding citizens.

I do sympathize with people who have addictions. Personally, my uncle died because of an overdose of Methadone. This effected my family and loved ones.

In addition, I don't see how introducing one addictive drug to an addict hooked on a different addictive drug can help the person.

I believe the only positives from this clinic will be; a very few addicts become sober, money for a certain few and the county jail will have their job security.

I implore you to vote NO on this proposal.

I also believe this clinic would be better close to a hospital for emergent medical issues.

Thank you for your time and service,

Frank Morgan

I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of

the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

State of Tennessee

Re: Request to be added to the board members' packet - Concerning Opposition to Certificate of Need -Cedar Recovery Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee.

Dear Board Members:

I am a resident of Putnam County, Tennessee. I am very concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote **against** the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add this letter to the board members' packet for the hearing in regards to the application.

I understand that opiate addiction is a problem in our state, but the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Venture capital investor's view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

2) The Upper Cumberland region has several non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

3) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

It is my understanding that one of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in the facility in becoming a "drop" for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is **definitely not** wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote **against** the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

Cheryl J. Morse

Cheryl J. Morse
1231 Belmont Drive
Cookeville, TN 38506

To whom it concerns,

I strongly oppose the effort of Cedar Recovery to place a methadone clinic in Putnam County. I am not opposed to people who need help getting it. However, there are already many places nearby to receive help.

All healthcare workers I have spoken to say methadone does not work and leads to other issues.

Burgess Falls Road is already quite busy and doesn't need additional traffic entering and exiting with drivers who can be impaired.

The sports training facility is open for children and young adults and is right there!

NOT A GOOD IDEA FOR OUR COUNTY!

Respectfully submitted,

Karen Rice 6-24-2024

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

Terry G & Doris A. Flutt

Request to Be Added to the Board Members' Packet for July 31st hearing

Dear Health Facilities Commission,

We are residents of Putnam County, Tennessee. We are tremendously concerned about a proposed methadone clinic in our county. We are writing to you as private citizens urging you to VOTE AGAINST the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee.

While we understand that opiate addiction is a problem in our state, we do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder, **INCLUDING A SUBOXONE TREATMENT CENTER OWNED BY CEDAR RECOVERY LOCATED LESS THAN A MILE FROM THE PROPOSED LOCATION OF THE METHADONE CLINIC.**

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school, not to mention the three churches and many subdivisions of homes (including ours of 35 years) within 0.4 miles. The possibility of the number of impaired drivers leaving the methadone clinic is beyond frightening. Cookeville, TN has two main roads. South Willow Avenue is one of them. At the end of the Cookeville city limits South Willow Avenue changes to Burgess Falls Rd. This area is still very heavily populated. When Cedar Recovery was rejected from opening the methadone clinic in the city limits on South Willow Ave at the location of their fully operational suboxone clinic, they found a location as close as possible to the county line. Same road, just half a mile down the road. Still unwanted. All this to say, the road is traveled by thousands daily and this clinic would be a safety liability on this main road.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities.
Furthermore, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted."
With this letter, we are informing this board that the methadone clinic proposed by Cedar Recovery is definitely NOT WANTED in our area. Please note our opposition to this proposed clinic. Again, we urge you to vote against the Certificate of Need for which Cedar Recovery has applied. Thank you.

Sincerely,
The Colvert Family

Subject: [EXTERNAL] CON for Cedar Recovery in Putnam County

Tennessee State health facilities commission, (Please forward a copy of this letter to all commissioners meeting packets)

I am a resident of Putnam county and live approximately 1 mile from the location where Cedar Recovery desires to place a methadone clinic. It is my understanding your commission will meet July 29, 2024 to vote on a certificate of need for this facility. I wish to oppose that request for the following reasons.

I am no stranger to the devastating consequence of opiate and drug addiction in Tennessee. As a retired physician assistant, I have cared for hundreds of such patients in Knoxville 2013 through 2021 (retired in 2021.). I worked primarily in the hospital inpatient setting during those years. My experiences, especially during that time, don't allow me to believe that long-term prescribed narcotics will solve the problems related to opiate abuse. I also am aware and disagree with, that the federal government (the same administration that promotes illegal entry of drugs into our country) is encouraging both the continuation and promotion of methadone use, thus necessitating, more methadone clinics to dispense and treat OUD. There is a growing trend to relax the standards for dispensing methadone as well; I have red CMS data in JAMA and the push creating a "new national priority". Also the DEA on August 8 of 2023 revised regulations to expand access to methadone. In addition, SAMHSA is pushing the same agenda. In the face of all this I say again: I'm not for more narcotics being dispensed to treat narcotic addiction. I know much of the "science" points to the best treatment being continued use, possibly forever, but I believe the focus should be on prevention of OUD not sustaining it. Why can't we as a medical community, state and federal government insurance industry, emphasize prevention not dispensing more narcotics!

I recognize it's highly unlikely that presented with all the "medical data" and government encouragement, with word and money, that I or anyone else for that matter, will change your mind about not granting more certificate of needs for such facilities, even though many communities strongly oppose them. But… Even if the board, in spite of local opposition within our community, grants Cedars request, please give us the right to oppose the location. Our current legislators would seem to agree that location decisions, and even their presence should be determined by local government, meaning at the county or city level. You are probably aware that in this current year our state Senate proposed a bill SB2321 that passed in the Senate unanimously and went to the house there after. HB 2140 was created and went through subcommittees without any apparent opposition and was presented to the house for a vote, as I understand it. For reasons that are unclear to me it didn't come to a vote however before session ended on April 17, 2024. These bills and support thereof indicate to me the legislative desire to give local control where these clinic should be located, as determined by local citizens, and their appointed/elected representatives.

In the event you don't think that the above information is pertinent at this time let me tell you why I think that the current chosen site is a poor choice. This site, well known to me, as I drive this road daily, is a busy road especially in the morning and afternoon when school gets out and when the workday traffic is headed home. The site is already somewhat dangerous because there is already a facility there called Elite Sports training, with a small parking area and no easy entry or exit into the parking lot off the main road. More cars at an already busy time will make this more dangerous in my mind. In addition, this site as already stated is a place that children go for sports training, including my own grandchildren. This is located in the same building as the proposed clinic. In addition, there are many businesses, private residences, two churches, two day cares and a dollar store, some immediately adjacent but all less than 1000feet.

For all the above reasons, and more which will be heard from our county representatives and citizens, I beg your committee to say no to Cedar Recovery's request, ideally a total denial for a clinic in Putnam county, but at least a choice regarding the location. Thank you.

Sincerely,
Steven L Zurlinden

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

To Whom it May Concern:

I am a resident of Putnam County, Tennessee. I am very concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen, business owner and as a Putnam County School Board Member urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

My husband, Shawn Fry, and I are attorneys in Putnam County. Shawn practiced criminal law for more than twenty-seven (27) years and in August of last year was appointed to the position of Criminal Court Judge Part III. I am very aware of the opioid addiction issue in my community, and I do not believe that a methadone clinic is the proper way to address the issue. Furthermore, the proposed clinic in Cookeville is problematic for several reasons.

First, Methadone, and other substances like it, is simply trading one drug for another. I cannot recall a single success story of any client that we represented who followed the proper protocol of methadone to find sobriety long term. In fact, the vast number of clients would obtain methadone and sell most all of it on the streets. I have a family member myself that was recently charged with child abuse based on her obtaining Suboxone on the streets while pregnant and the baby tested positive. She admitted to law enforcement that she had been buying it on the streets since November 2023. I am attaching the warrant for your reference but have redacted her name.

Second, the Upper Cumberland region has a number of non-substitution-based treatment programs that know our communities and are actively cooperating to help residents overcome opioid use disorder. These programs are long term with a goal of helping people reach sobriety and getting to the core of their addiction. This type of program supports participants through the rehabilitation process, including reunification into the community with a job and housing. This critical step for success is imperative to ensure former addicts can be productive citizens.

We do not have a need in Putnam County for a methadone clinic and it would be a disruptive entity within the recovery community.

Lastly, and most importantly, is the safety issue. The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, and is within 0.3 miles of a daycare facility. My thirteen-year-old niece is an avid softball player and participates in training at this sports facility. As a school board member, I know that many of our school sports teams train at this facility. Allowing a methadone clinic to operate in the same building as this training facility places children at risk of encountering drug users and abusers. I am including a picture of the building located at 1805 Burgess Falls Road for your reference.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not needed nor wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

GENERAL SESSIONS COURT OF PUTNAM COUNTY TENNESSEE

STATE OF TENNESSEE vs. [redacted]

State Control # PUTNAM COUNTY Case # [redacted]

AFFIDAVIT OF COMPLAINT

The undersigned affiant, after being duly sworn according to the law, states that [redacted] whose name is otherwise unknown to the affiant, committed the offense of:

1 Count(s) of 39-15-401-- Child Abuse and Child Neglect or Endangerment-- (Felony)

at on or about 10-01-2023 to 06-03-2024.

Further, the affiant makes oath that the essential facts constituting said offense, the sources of the affiant's information, and the reason why his/her information is believable concerning said facts are as follows:

On June 3, 2024, [redacted] gave birth to a baby boy. A social services worker at Vanderbilt Children's Hospital made a DCS referral on June 4, 2024. The referral states the following: [redacted] has been taking Subutex without prescription since 08/2023. [redacted] has been getting Subutex off the street. [redacted] reports taking 2 mailgrams a day. [redacted] is not in active treatment for substance abuse. [redacted] had one prenatal appointment in March of 2024. [redacted] did not seek any other care. [redacted] was actively withdrawing at the hospital at the time of birth. [redacted] tested positive for amphetamines and buprenorphine. The cord screen for the child was sent off. The results have not returned. Currently there are no signs of NAS. Personnel is monitoring the child."
On June 6, 2024, Baby Boy [redacted] cord drug screen came came back from Vanderbilt University Medical Center. Baby Boy [redacted] umbilical cord tested positive for Norbuprenorphine, Amphetamine, and Methamphetamine. Said offense occurred in Putnam County, Tennessee.

Subject: [EXTERNAL] Opposition to Certificate of Need - Cedar Recovery Methadone Clinic at 1805 Burgess Falls Road, Cookeville, TN

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am very concerned about a proposed methadone clinic in my county. I am urging you, as a private citizen to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, TN.

Please add this letter to the board member's packet for the hearing on the application.

There are currently 64 methadone clinics located within a 25 mile radius of Cookeville. The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

This clinic in our area is problematic for the following reasons:

Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone also carries a FDA warning as a possible addictive drug.

Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose control of the clinic. With more interest in making money than actually helping addicts.

The location of the clinic is in the same building as youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare center and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility from becoming a 'drop' for patients of the clinic, and that there would be no way to prevent patients from selling methadone in the parking lots of such facilities.

The administrators stated they would not locate a facility "where they are not wanted".

With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

Dorothy Surbaugh

Re: Putnam County Resident Elijah Willis
Opposition to Certificate of Need- Cedar Recover Methadone Clinic

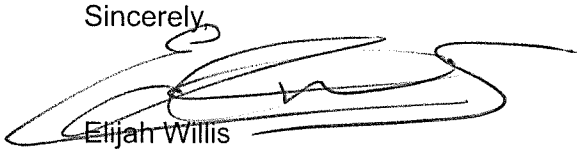
Request to Be Added to the Board Members' Packet

Dear Sirs,

I am a citizen of Putnam county and I would like to give you a quick history of my life. I was born and raised here in Cookeville by 2 Pastors. I quickly fell in love with sports. Playing 3 sports from 5-18 I excelled in all but my favorite was football. I played ball for 13 years and was injured my senior year at a senior mvp invitational game in North Carolina. After surgeries and procedures I began my journey with drugs which lasted a decade before everything fell apart and I was homeless and alone. I was prescribed everything from hydros to oxy to methadone. I went through a program and gave my life to God. My final straw was living in a broken down car and having to hustle and line up rides each month to a methadone clinic in Maryville, where my script was sold and traded before I got out of the parking lot. I was living in hell. Methadone does not work. I've listened to these folk say they are in 17 years recovery and thanks to methadone they are free and sober. How deceived. Chained to methadone. It turns my stomach to think about seeing a building with a line of people standing outside holding that ball and chain, embarrassed as their community drives by, looking down and can't make eye contact. Living a lie of false freedom as they are hooked on this drug. Not to mention the absolute nightmares that are coming from out of town to get theirs. And the insanity and crime they bring with them. I know from experience, I was that guy stealing from people's vehicles, stealing from porches and garages while in town for my prescription. We absolutely stand against this clinic opening here. I am now a director for a long term recovery program here in Cookeville. We have several incredible and successful drug addiction programs here. Our community does not need this proposed methadone clinic in our county. I am writing to you as a private citizen urging you to vote against the application for a certificate of need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you serve us in your role and speak for us against this.
While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic is the answer. We have several established and successful answers to

addiction and I have personally devoted my life to doing this work. Thank you for your time and your service to our state. Please listen to the people you serve and be our voice. God bless you.

Sincerely,



Elijah Willis

My name is Erika Robinson. My husband and I relocated to Putnam County in 2022 after prior time spent in northern California. We purchased a home in a subdivision about 1 mile from Burgess Falls Rd. Part of the reason we chose to live in this area is that it is rustic, peaceful, yet still accessible to many of the amenities in Cookeville and neighboring cities and within reasonable driving distance from Nashville, Knoxville and other larger metro areas.

We are very concerned about the proposed building of a methadone clinic in our neighborhood and oppose Cedar Recovery's plans to open this facility in Putnam County. Having become familiar with resources and services for those looking to overcome opioid addiction, we learned that Cedar already has a facility approximately half a mile away in Cookeville from the planned location for this new clinic, deeming it unnecessary to install another similar facility in such close proximity. Those within Putnam County and neighboring counties who are seeking such a service already have this Cookeville location. Within another mile of this facility is Spero Health which provides addiction treatment. There is also Bicycle Health and numerous other facilities and organizations that offer these services. There are more than enough places where addiction treatment assistance is being provided that are readily accessible to Putnam County residents that there is no justifiable need to further disrupt a peaceful community with another facility.

It is also concerning to us that the state would even consider allowing another similar facility to be established right next door to a business that regularly serves children. Elite provides athletic training and programs for children and is next door to the space where Cedar Recovery is trying to establish its clinic. It is unacceptable to have children in a setting where they could be interacting with addicts and the potential dangers that could occur from those with nefarious agendas who wish to make exchanges for medication provided to those seeking services or target the facility to steal the drugs within for resale. There are also the inherent risks of those who are impaired driving and engaging with children and their families. Beyond Cedar Recovery not being able to demonstrate need for this new clinic in our community, putting children in harm's way is not something we support.

We do not support the approval of Cedars CON to expand their business in our community with the opening of a 2nd facility in Putnam County and want them to take their business elsewhere.

Erika Robinson, MPH, MHSA, CPHQ

Subject: [EXTERNAL] Opposition to Certificate of Need - Cedar Recovery

Dear Sirs:
I am a private citizen/resident of Putnam County, Tennessee and write to you very concerned about a proposed methadone clinic in my county that is in the same building that my 12 year old, 9 year old and 7 year old children frequent weekly for sports lessons and various camps over the school break periods. The proposed location is also extremely close to one of our elementary schools and also one of our middle schools.

I respectfully am asking you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:
1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) As previously mentioned - the location of the proposed clinic is in the same

building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. - where children anywhere from 4+ years old frequent daily.

Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I implore you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,
Erin Bullington

Re: Putnam County Resident Jennifer Willis
Opposition to Certificate of Need- Cedar Recover Methadone Clinic

Request to Be Added to the Board Members' Packet

Dear Sirs,

I was born and raised in Putnam County. I now direct a program in Cookeville for people who have suffered from addiction. My life took a terrible turn in my 20s when I fell into addiction. I lost everything. I was so addicted to opiates that I would do anything to kill the pain when I was in withdrawal. That often led me to purchasing methadone on the streets. I would seek out as many people as I could to buy methadone from. I wanted it because it had a long half life which made it last and I could mix it with other drugs to get more high. I drank it and I also shot it with a needle. I used all opiates, but methadone is what I tried to get my hands on most. I knew several people who traveled out of town to go to the methadone clinic. They often paid people for urine that only had methadone, because they were on other drugs and sold the methadone they were prescribed. When they went to the clinic once a month they gathered money from people to buy their prescription. These people usually rode to the clinic with them. I rode with these people often. In the parking lot of the clinic many of the cars were full of people doing the same thing. We would pull off and the phone calls began. Selling the entire prescription to end up making around $5,000.00.

In the beginning these people had to go to the clinic every day to get their dose. After a short time they were sent home with a lock box full of a 14 to 28 day supply of methadone. Each wafer sold for 40$ to 50$ on the street. One particular person I knew was given 4 a day. The liquid methadone was even higher. That adds up. He was a drug dealer and so was the clinic. Everyone I've ever known who got a prescription of methadone was a drug dealer. I hung around them. They were dangerous and vile with no regard for anyone's life.

I've heard of people who travel out of town to the clinic going on a crime spree on the way back through. It's easier to commit crime where you don't live.

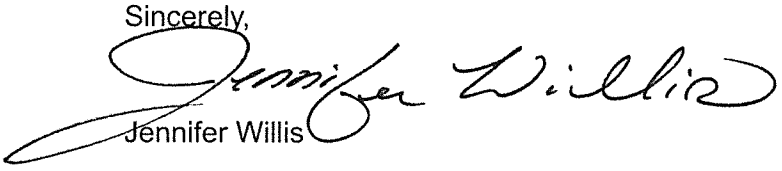
I've seen people overdose on methadone and I myself have had some very close calls.

We do not want a methadone clinic in our community. It would be devastating. We have several good programs here that do not teach people to trade one drug for another. It is only bondage and legal drug dealing that makes way for illegal drug dealing. This is a life destroyer. You are hearing from someone who knows that.

I found my freedom at a program much like the one I have the honor to be a part of now. The solution is hard work, dedication, mercy, love, discipline and people who teach you to have a purpose.

Thank you for your time. Please don't allow this hell to be in our community.

Sincerely,



Jennifer Willis

Attn: Logan Grant

Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs,
I am writing to express my strong opposition to the proposed location of a methadone clinic in the same building as youth sports activities and in close proximity to public schools and churches. While I understand the importance of providing treatment for those struggling with addiction, situating a methadone clinic in a location frequented by children and families raises significant concerns. Our youth need safe and supportive environments that foster healthy development, and the presence of a methadone clinic in such close proximity to schools and recreational facilities could pose risks to their well-being. Placing a methadone clinic in this area could potentially expose children to individuals undergoing treatment for addiction, which may not always be conducive to a safe and nurturing environment. Additionally, the presence of the clinic may lead to increased traffic and safety concerns, potentially disrupting the daily activities of students and families. I urge you to consider alternative locations for the methadone clinic that do not pose a risk to our children and the community. There are undoubtedly other areas better suited for this essential service, where it can operate without compromising the safety and security of our youth.
Thank you for your attention to this important matter. I trust that you will consider the concerns of the community and prioritize the safety and well-being of our children. Your platform indicates your strong desire to protect children. Would you send your school age children to a youth sports complex that shares

a facility with a methadone clinic?
Sincerely,
Mr and Mrs. Nathan and Leslie Wehage
Cookeville Resident and parents of three school age children.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely, Richard D. Harrington Jr.

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility “where they are not wanted.” With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

There are currently matching bills in the State House and Senate that would put restrictions on where such facilities could be located in Tennessee counties. I feel Cedar Recovery is trying to fast pace this facility to be grandfathered in before those restrictions can be put in place. The location they have chosen is next to a youth athletic training facility and very close to several churches with a strong youth presence.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Subject: [EXTERNAL] CON for Cedar Recovery in Putnam County

Tennessee State health facilities commission, (Please forward a copy of this letter to all commissioners meeting packets)

I am a resident of Putnam county and live approximately 1 mile from the location where Cedar Recovery desires to place a methadone clinic. It is my understanding your commission will meet July 29, 2024 to vote on a certificate of need for this facility. I wish to oppose that request for the following reasons.

I am no stranger to the devastating consequence of opiate and drug addiction in Tennessee. As a retired physician assistant, I have cared for hundreds of such patients in Knoxville 2013 through 2021 (retired in 2021.). I worked primarily in the hospital inpatient setting during those years. My experiences, especially during that time, don't allow me to believe that long-term prescribed narcotics will solve the problems related to opiate abuse. I also am aware and disagree with, that the federal government (the same administration that promotes illegal entry of drugs into our country) is encouraging both the continuation and promotion of methadone use, thus necessitating, more methadone clinics to dispense and treat OUD. There is a growing trend to relax the standards for dispensing methadone as well; I have red CMS data in JAMA and the push creating a "new national priority". Also the DEA on August 8 of 2023 revised regulations to expand access to methadone. In addition, SAMHSA is pushing the same agenda. In the face of all this I say again: I'm not for more narcotics being dispensed to treat narcotic addiction. I know much of the "science" points to the best treatment being continued use, possibly forever, but I believe the focus should be on prevention of OUD not sustaining it. Why can't we as a medical community, state and federal government insurance industry, emphasize prevention not dispensing more narcotics!

I recognize it's highly unlikely that presented with all the "medical data" and government encouragement, with word and money, that I or anyone else for that matter, will change your mind about not granting more certificate of needs for such facilities, even though many communities strongly oppose them. But… Even if the board, in spite of local opposition within our community, grants Cedars request, please give us the right to oppose the location. Our current legislators would seem to agree that location decisions, and even their presence should be determined by local government, meaning at the county or city level. You are probably aware that in this current year our state Senate proposed a bill SB2321 that passed in the Senate unanimously and went to the house there after. HB 2140 was created and went through subcommittees without any apparent opposition and was presented to the house for a vote, as I understand it. For reasons that are unclear to me it didn't come to a vote however before session ended on April 17, 2024. These bills and support thereof indicate to me the legislative desire to give local control where these clinic should be located, as determined by local citizens, and their appointed/elected representatives.

In the event you don't think that the above information is pertinent at this time let me tell you why I think that the current chosen site is a poor choice. This site, well known to me, as I drive this road daily, is a busy road especially in the morning and afternoon when school gets out and when the workday traffic is headed home. The site is already somewhat dangerous because there is already a facility there called Elite Sports training, with a small parking area and no easy entry or exit into the parking lot off the main road. More cars at an already busy time will make this more dangerous in my mind. In addition, this site as already stated is a place that children go for sports training, including my own grandchildren. This is located in the same building as the proposed clinic. In addition, there are many businesses, private residences, two churches, two day cares and a dollar store, some immediately adjacent but all less than 1000feet.

For all the above reasons, and more which will be heard from our county representatives and citizens, I beg your committee to say no to Cedar Recovery's request, ideally a total denial for a clinic in Putnam county, but at least a choice regarding the location. Thank you.

Sincerely,
Steven L Zurlinden

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to be added to the Board Members' Packet

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility and is within 1,135 feet of a homeschool umbrella office, within 2,000 feet of Parkview Elementary school, within 2,500 feet of an industrial park, just several hundred

feet from 3 Churches and only 800 feet from my property. Some of my neighbors are even closer. The angry part is next

5) How many of the Health Committee menbers live within 1,000 feet of a methadone clinic, how about the owners and managers @ Cedar Recovery? And yet, it's no problem for Cedar Recovery to want to put a clinic into a neighborhood full of churches, businesses, daycare facilities, a new school and a very new Industrial Park that affects existing business and possible new ones. The Hippocratic Oath requires Doctors to "do no harm". Putting in a clinic that dispenses one narcotic for another is not the definition of "do no harm", it a straight up drug swap. What's the difference if you are hooked on Camel cigarettes (unfiltered) and decide to kick the habit by switching out to something with a filter like Marlboro`s? Medical supervision? What's the difference between a Doctor and a Pusher? In this case, just the drug.

6) We're not supposed to use the "not in my backyard" or NIMBY argument but in this case I will because statistically it doesn't make sense to put in a clinic that is so divisive in nature and affects thousands of nearby residents while it admittedly will serve but a handful of patients in proportion to the population of a single county; Putnam County. The relation of population to prospective patients in the 12 county region is less than .0023%. In just Putnam it is far less than that. Cedar Recovery by their own admission claim a patient loading of 200 per month from a 12 county region of which only about 65 coming from Putnam. In addition, I have consulted with numerous Real Estate professionals in the community with decades of experience that conservatively warn that a Methadone clinic will adversely affect property values by at least 20%. If my property values go down, do my taxes adjust down? Never seen that one. Also, if I list my property for sale and have to ask for less because of the proximity to a Methadone Clinic, is this not a subsidization of an undesirable entity in my community? What happens if the sale of my house were to fall through because the prospective buyer found out that there is a Methadone Clinic in close proximity to their possible new home and decides not to buy the house? That's a 100% loss to me and my family or anyone else in a similar situation, so in effect the "not in my backyard" is a very real situation, not just a simple objection.

7) Now; y'all can say that these are all hypotheticals and not applicable to the Methadone Clinic because the owners at CR have nothing but the best of intentions and want only what's moral and just for the community they aim to serve. I have news for you; life is one big hypothetical, subject to change at the next phone call, text message or email. IMHO, introducing a Methadone Clinic into a neighborhood like mine is an unacceptable risk to me and mine, as well as my neighbors, my friends and the folks that are carving out a living with nearby businesses. There are a lot of seniors and retirees in the neighborhood that should not have to deal with something like this, that will serve so few in proportion to the level of hostility generated by this Certificate of Need. In my

opinion, this Certificate of Need should not be approved solely on the basis of not providing services to enough people in proportion to the level of discomfort/inconvenience and ill will as well the total accommodation that will be needed to put up with Cedar Recovery's presence in the Community.

8) This is not a "normal " business in any sense, this is a business that focuses on taking money from a variety of federal/state sources and from insurance companies of which "We the People" fund via Income tax and insurance premiums while treating an addiction where there are 14 other locations throughout the state that addicts could access but CR needs one here because this is an absolute cash cow that will justify a 2.5m dollar expenditure to build. It will cause massive inconvenience and pain to all around it for almost nothing to be gained as a result. IMHO, this is not a benevolent business. It has little redeeming value relative to its surroundings while exacting a great cost to the community. These addicts should be going at their addiction cold turkey, that's how you beat addiction. It's not incumbent on the community surrounding this business to subsidize it by sacrificing our lifestyle, degrading our real estate investment in terms of property value and a loss of overall security for but a handful of individuals that have far more control over their situation than do I and need to accept responsibility for their situation. This clinic is in effect a penalty for all of us that are law abiding, work hard every day, save money, maintain our property and make measurable contributions to the community on a daily basis. CR needs to find another venue or drop the effort entirely. We don't need this on the Cumberland Plateau.

9) There are 4800 people in a 1.8 Mile radius of the proposed site. That number increases during work hours due to an influx of workers to the Industrial park as well as Church activity and other necessary functions. What about their quality of life? Would any of you on the board want to live within a short distance of this clinic? Be honest. In essence, placing this clinic in close proximity to residential areas increases our Misery Index substantially, for a very, very small part of the community that can't control their habits for addictive drugs and are now addicts. Why does the community have to bear the brunt of, a for profit clinic to dispense narcotics to a group of people that we technically aren't in control of nor do we have any responsibility for? The US was founded on the precept of individual responsibility. There is no way that this makes sense.

10) Remember, CR, by their own admission, is only going to serve 200 patients per month in a 12 county area and in exchange for this, we the people, of Putnam County are supposed to take the hit for them being here. The thing that I resent the most is the fact that I have to spend my time, my resources, which btw could be used for much more productive ends, like working my 60 hr. a week job and traveling 50,000 miles a year, taking care of my family and farm, while trying to stem off an invasion of Cockroaches and Vultures in the guise of a Healthcare organization that wants to pick

the bones clean off of an addicted miniscule population because there is a huge pot of money set aside to fund the dispensing of legal narcotics. Have I got that right? Y'all may have a different opinion but that's mine.

On top of that we have just one last item to air out.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a “drop” for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility “where they are not wanted.” With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted near my house or anywhere in the 12 county region. Put it somewhere else.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Very truly yours,

Terry Moore

I am a long-time Cookeville, Tennessee resident (since 1976), practicing MD, a Medical Review Officer with the Federal Drug Testing program since 1988 and business owner. Cedar Recovery's plan to establish a methadone clinic at 1805 Burgess Falls Road in Cookeville, Tennessee would have incredibly detrimental effects on our community and will dramatically increase our crime rate. I'm vehemently opposed to their application for a certificate of need.

I strongly request the Health Facilities Commission vote against Cedar Recovery's application. Please see the facts below regarding Methadone.

Methadone is a long-acting full opioid agonist, and a Schedule II-controlled substance. Other medications may interact with Methadone and cause heart conditions. Even after the effects of Methadone wear off, the medication's active ingredients remain in the body for much longer. Unintentional overdose is possible if patients don't take the Methadone as prescribed.

Common side effects of Methadone include restlessness, slow breathing, constipation, and sexual problems. Serious side effects of Methadone include difficulty or shallow breathing, feeling light-headed or fainting, a fast or pounding heartbeat and hallucinations or confusion.

Pregnant women who experience withdrawal may be at risk for miscarriage or premature birth as withdrawal can cause the uterus to contract. It is possible some babies may experience withdrawal, also known as neonatal abstinence syndrome, after birth.

Studies have provided direct evidence that chronic methadone consumption has damaging effects on brain white matter. Methadone is a highly liquid soluble synthetic opioid, and it is well absorbed by the brain with a strong affinity for u-opioid receptor. Impairment can be regarded as reflecting neuro-toxic effects of chronic methadone use, which may contribute to impaired brain function and cognitive function in methadone treated patients.

Buprenorphine, which is the main drug in Subutex and Suboxone is a Schedule III-controlled substance. Buprenorphine is an opioid partial agonist. It produces effects such as euphoria or respiratory depression at low to moderate doses. With Buprenorphine, however, these effects are weaker than full opioid agonist such as Methadone and Heroin.

Common side effects of Buprenorphine include: dizziness, drowsiness and fatigue, tooth decay, inability to sleep, tremors, and disturbance in attention. Serious side effects include: respiratory distress, overdose, dependence, withdrawal, and neonatal abstinence syndrome in newborns.

Patients with active dependence on Buprenorphine had impaired working memory, learning, attention, psycho-motor speed, and flexibility. They had poorer cognitive speed and flexibility, sustained attention, and verbal working memory. This cognitive dysfunction persisted in studies even after controlling for intellectual function and confounders.

There are currently approximately 600 opioid treatment programs (OTPs), colloquially called Methadone Clinics, which are owned by private equity backed providers. This represents nearly one-third of all OTPs. Private interests are gaining an outside influence in the treatment industry. The OTP space has primarily been a for-profit endeavor for years. It has increasingly been so in the last decade. More than other areas of healthcare, addiction medicine or mental health treatment are very opaque in the same way that private industry is very opaque. Couple those together, you basically have a black box.

Every crisis presents an opportunity, as the saying goes. And when it comes to opioid addiction, investors and businesses are seeing a big opportunity in addiction treatment.

Sincerely,

Toney B. Hudson M.D.

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

Balem D. Seedbetter

June 23, 2024
Dear Tennessee Health Facilities Commission,

SUBJECT: OPPOSED TO A OPENING A METHADONE CLINIC IN PUTNAM COUNTY

We are strongly opposed to opening a methadone clinic in putnam county. We are not opposed to programs helping people free themselves of their drug addictions. We have a lot of faith based and other treatment programs in our community. We do not believe such facility should be located in our residential neighborhood. This proposal site has a high traffic rate already, close to churches and one school. We feel we already have many programs here to help people who truly want to get off their addiction. We Oppose this plan totally.

Thank you,
Brad and Heather Thomas

Subject: [EXTERNAL] Methadone Clinic in Putnam County

To the Health Facilities Commission:

We are life-long residents of Putnam County, and are categorically opposed to Cedar Recovery's application for a Certificate of Need to locate a methadone clinic here for several reasons. We hope you will include our letter of opposition in the packets of the Health Facilities Commission members in preparation for the hearing on July 29th.

1. Safety - The proposed location is near the new Parkview Elementary School, a daycare, churches, residences, and a training facility for youth. Burgess Falls Road is a heavily traveled corridor into the City of Cookeville, I-40, nearby businesses, schools, and homes. Methadone is not a drug without risks, especially for people who take it for long periods and with other substances, posing long-term health issues. It can also create safety issues on our roads because of impaired driving.

2. Need - Putnam County has a population of roughly 83,000 residents. Cedar Recovery's certificate of need indicates that 50 Putnam County residents travel to methadone clinics in other areas. This translates to .06% of the population. Sadly, these folks are traveling outside the county, when other avenues of recovery are available locally. Cedar Recovery's Paul Trivette stated on a local news program that they have identified 101 people in the Upper Cumberland area who travel to methadone clinics. This translates to only .02% of a population of about 352,000. How do these numbers reflect a need for a private business to operate? What private business model would attract investors to fund $5,000,000+ in such a small market?

Won't it be necessary for Cedar Recovery to **create a market** to meet investor expectations for ROI? The Upper Cumberland area doesn't need methadone ending up on our streets, exacerbating the problem Cedar Recovery claims it wants to solve.

3. Crime - A consistent message that we have heard from people who have moved to Middle Tennessee from other areas near methadone clinics is the detrimental effects these clinics bring to a community. Newcomers have shared anecdotal evidence of increased crime, property devaluation, accidents, homelessness and urban blight.

4. False Advertising - Several former addicts and specifically former users of methadone, have shared their experiences with this drug, which neither offers treatment nor recovery from addiction. Recovery is not achieved when an individual afflicted with substance abuse disorder is tied to a clinic daily to sustain a "legal" drug addiction. This is not recovery nor is it freedom from addiction. Cedar Recovery should at least be required to change its advertising to reflect this outcome.

5. Availability of Local Resources - The Upper Cumberland area has resources for people with substance abuse disorder. The effort to coordinate, support and communicate treatment options is ongoing by local organizations with successful recovery outcomes. These organizations do not profit from the people they help and do not prey on those with substance abuse disorder for profit with a business model largely funded by taxpayers.

6. Government Overreach - While we're certain the Health Facilities Commission serves a vital role in the healthcare resources in Tennessee, local government and the will of the majority of the people who live and work in the community should be considered in decisions that involve opioid distribution and use in their midst.

When deciding whether or not to grant Cedar Recovery's CON at 1805 Burgess Falls Road in Cookeville, we implore you to consider the negative impact on 99.98% of the people living here who will bear the brunt of your decision. Local organizations are having success helping folks overcome addiction, some without government funding and/or a profit motive. I pray for God's guidance for all those involved in this process.

Respectfully,

David & Jill Horner

Re: Opposition to Certificate of Need – Cedar Recovery Methadone clinic at 1805 Burgess Falls Road, Cookeville, TN
Request to Be Added to the Board Members' Packet

Dear Sirs:

My name is Jack Gill and I stand with fellow citizens who are FOR the complete and drug-addiction-free recovery for our fellow citizens; WITHOUT the continued damage to their health from perpetual drug addiction; WITHOUT the collateral consequences from the catalyzer methadone clinics on the well-being and safety of our families, friends, fellow citizens and our communities; and WITHOUT the threat of potential venture capitalists perpetually profiting off the backs of our fellow citizens and degrading the quality of life in communities and neighborhoods that residents relocating to Putnam County from other states have voiced.

This is Cedar Recovery's, a for-profit business, third attempt to locate a methadone clinic, which treats citizens addicted to drugs with other addictive drug(s), near or inside Putnam County.

As you are presented multiple reasons voiced in letters and at the upcoming Cedar Recovery's Certificate of Need hearing on why Putnam County does Not Need a methadone clinic, the most appalling is the unholy alliance among Government-Big Pharma-Medical for Profit Business that advocate perpetually enslaving our citizens addicted by making it easy to keep them chained to addiction.

Addicted for Life - In our questioning of Cedar Recovery leadership, they have been less than transparent. For example, they use the "evidenced base treatment" diversion to avoid answering how effective their treatment is in getting addicts drug-free. When the truth finally emerged the "recovery" CR advocates is primarily legalized addiction conceivably for life for the majority of their customers.

A Growth Industry - An incentive for a business is to grow the customer base. In Cedar Recovery's CoN, they project in year 1 about 100 customers and $450K+ revenue. In year 2 that grows to almost 300 (a 300% increase) and nearly $2M revenue, and beyond that our fellow citizens will become a source for Cedar Recovery's expanding customer-base. On the contrary to say we are in buisness to shrink the demand for our product by reducing the customer-base makes no business sense.

The Long Haul – Cedar Recovery has been tenacious towards bringing their business into the Upper Cumberland with little regard to public outcry. Yet CR leadership claims to be committed to the community … I suppose with the caveat "until they are not". Research indicates there is a laundry list of long term issues relative to for-profit methadone clinics including: profit motive vs patient outcomes, higher counselor caseloads & staffing retention, low success rates e.g. less than 2% of clients weaned off methadone, perpetuation of restrictive rules, dose-and-go operations, long-term dependency, financial burden on customers, and resistance to reforms. During this honeymoon period leading up to the CoN hearing, Cedar Recovery is promoting what benefits their business. If and when Cedar Recovery is sold where is the "prenup" due the citizens and communities that have been harmed from collateral consequences.

During the course of Concerned Citizens of Putnam County's Deny Cedar Recovery's CoN petition campaign, we learned and witnessed much concerning the realities surrounding methadone clinics from citizens with first hand experiences. For example, former addicts including methadone users who are now drug-free were among the first to sign because they were motivated to break the chains of addiction. Former addicts who are now drug-addiction-free coming out of Faith based recovery programs have a resolve to remain drug-free and help others. And, there were various stories of drug addicts who sank so low but were still able to muster the self-will to overcome addiction. On the hand, where is the motivation or will to overcome treatment programs that facilitate continued addiction?

I along with like-minded citizens petition the Health Facilities Commission to deny Cedar Recovery's Certificate of Need for a Methadone Clinic to be located at 1805 Burgess Falls Road, Cookeville, Putnam County, TN.

Sincerely,

Jack W. Gill

RE: Proposed Methadone Clinic in Cookeville

Dear Mr. Grant,

I am writing today to express my extreme displeasure and concern with the potential for Cedar Recovery to install a methadone clinic here in Cookeville. Neither the city nor the county wants nor needs a methadone clinic built here.

Methadone is simply not a proven treatment method and pales in comparison to other faith-based programs, which work well for people truly wanting to fight addiction and get off drugs with caring and affirming support. Methadone clinics only allow drug addicts to get drugs more readily and at low or no cost, and they keep people, who have no intention of quitting, addicted. Even more, they allow people to make money off illegal sales of drugs. If an individual simply has to take methadone at the clinic prior to leaving, and has to show up with it in their system when they arrive back to obtain their supply, they have days or weeks worth of supply that can be sold for profit. Additionally, since it is required that the individual take the dosage prior to leaving, they may be driving and otherwise commuting or hanging out intoxicated. These are not good things for any community.

Cookeville is a special place. We have worked hard to live up to the slogan, "There's Only One!" There truly is no other place like Cookeville. I operate a non-profit community group that welcomes new residents to the area, and one of our goals is to help acclimate individuals from other cities, states, and even countries to the trends, activities, and public beliefs and behaviors of Cookeville. We are not opposed to new ideas, but we work hard to protect what makes Cookeville so special. A methadone clinic would bring in addicts, individuals on the government dime (our dime), and non-contributing members of society to Cookeville in droves. Sure, Cedar Recovery would profit greatly from our tax dollars for this, but it would completely destroy what makes Cookeville Cookeville.

The reason that I am so opposed to a methadone clinic here in my home is that, other than padding someone's pockets, it has no benefit. I know from first-hand experience. I grew up in Seattle, and as a child I watched bearded men throw fish at the Pike Place Market and explored the history of the Pacific Northwest at Pioneer Square. I watched the ships come into the piers and explored the aquarium and art museums. My childhood was filled with so much culture in an amazing city. An amazing city that is now dying. In 2020, before the city shut down for good, my sister, who still lives there, would have to step over bodies on her way to work. Businesses are gone, and the city is slowly turning into a ghost town filled with squatters. And by squatters, I don't just mean the legal sense of the word; I also mean people literally squatting and defecating on the street. This is my experience every time I go back. I stopped going back. My home is gone. It's a fate that was ONLY possible with the adoption of

government-based, taxpayer-funded narcotic drug supply programs. This is the fate of Cookeville, if a methadone clinic is allowed. I cannot sit by and watch my home be destroyed again.

Three years ago, at 39 and 48, me and my husband were able to purchase our first home here in Cookeville. We had never been able to do so, and this community gave us that opportunity. Cookeville is a place that good people can come and live a life of integrity. It is a great place to raise kids, and retirement is possible for many. We don't want to have to leave, but I fear that our dreams of staying in Cookeville, which we have worked so hard to achieve, will be squashed if the destruction that a methadone clinic causes is allowed here. The thought of having to watch my home, Cookeville, be destroyed by a greedy and corrupt business like Cedar Recovery makes me simultaneously saddened and furious.

Please shut down this attempt by Cedar Recovery. We neither need nor want a methadone clinic here, as there are incredible people here who are doing amazing things for faith-based recovery in our town. We are a town that comes together to help people in need. There is no other place like Cookeville, and if people truly want help with recovering from an addiction, help is readily available.

Thank you,

Lauren Wilson

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

Amanda J Knox

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

State of Tennessee

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

Natasha Strong

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

Dylan Ferguson

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

Patricia Kenz

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

State of Tennessee

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

Janice Richards

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county, specifically as a resident who lives approximately one mile from this proposed location site on a road that will be a thoroughfare to get there. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder. This INCLUDES an office already offered by those who want to open this specific clinic.

4) The location of the proposed clinic is VERY concerning.
    a. It is to be in the same building as a very busy youth sports training facility.
    b. It is within 0.2 miles of a homeschool umbrella office.
    c. Within 0.3 miles of a NEW elementary school
    d. Within 2 miles of an elementary/middle school combo.
    e. Within a quarter of a mile to a new industrial park that is just now starting to take off with much needed jobs. Studies show that those looking to build large warehouses and manufacturing businesses will not buy and build close to methadone clinics as the rate of possible loss is too great for them to risk.
    f. SEVERAL housing developments surround this location, including many retirees.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms from such a facility becoming a “drop” for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility “where they are not wanted.” With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

Pamela Dawn White, SW Cookeville Resident

Gentlemen,

Please see my correspondence (attached), which needs to be added to the board members' packet for Cedar Recovery's CON to open a methadone clinic at 1805 Burgess Falls Rd in Putnam County.

I am a resident of White County, living near 1805 Burgess Falls Rd. I do not support a methadone clinic in Putnam or White Counties.

Sincerely,
Alexandra VanDaniker
869 Hutchings College Rd
Sparta, TN 38583

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:

I am a resident of ~~Putnam~~ White County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

I am writing you to not only ask you to PLEASE "hear" ALL of us concerned Citizens in Putnam County rejecting Cedar Recovery's Methadone Clinic in our growing community.

FOR MANY REASONS:

Putnam County is growing at a rate to that of what Mount Juliet, did 10 years ago. Our County has fought to keep our County clean and that includes keeping a Methadone Clinic OUT OF OUR county!

We have signed Petitions, sent Letters and Prayed!

Specifically the location you are considering is one of the WORST locations you could have picked, there is a young children's sports facility in the same building, there's also a children's daycare less than a mile away and a new elementary Elementary school scheduled to open this fall is less than 2 miles away! including that we are growing at a fast rate, with 400 new homes being built down the road on Burgess Falls Rd. which we already have accidents "daily" on this road, can you imagine once these 400 new homes are finished & the new Elementary school opens the traffic Burgess Falls Rd! Not only that we have MANY MANY homes in this area of families with small children, as well as Many Elderly living alone in their homes of 30+ years.

A Methadone Clinic SHOULD NEVER be put in a Residential area, EVER!! Anyone with common sense knows that!!

It will NOT BE SAFE for our Residents who live in this area. It will bring a INCREASE in Drug USERS, TRAFFIC, CRIME and DEVALUE our Properties!

PLEASE put yourselves in our situation, would you want this pushed on you in your neighborhood? Then please don't push it in ours!

Why should Putnam County Citizens pay the price of bad decisions made by a few individuals!? We Shouldn't!

NO ONE SHOULD!!

If you want to put another FAILED (Money Grab!!) Methadone Clinic in our Beautiful state of TN go find some land out in Carthage or somewhere where there are NO RESIDENTS, schools or businesses within 20 miles!

Medically & Scientifically Methadone has NOT been proven Effective.

And we don't know the long term side effects. YOU are trying to treat a drug addict with another DRUG that has been PROVEN "NOT" EFFECTIVE.

Naltrexone has been proven EFFECTIVE at encouraging Sobriety & Reducing Substance abuse and it's available by your regular doctor, which it should be under a Doctor's care!

One of my many fears is that if you should put this Methadone Clinic at this location, people are protective of their kids, homes & property... Do you think it is a wise decision to put a Methadone Facility where you have soooooooo many local Citizens AGAINST it!?

Lastly, I urge you to reconsider by knowing that our heavenly Father is watching EACH & EVERYONE of you... and what you do! You will answer for the decisions you make, especially those that affect many innocent people!

I pray to God that YOU will be humbled enough to DO what is right... for our Putnam County Citizens, HEAR US !!

AND DO WHAT IS RIGHT....NO METHADONE CLINIC IN PUTNAM COUNTY!!!

(Again, treat us as you would want to be treated in your neighborhood!).

Thank You for taking the time & consideration to read my letter.

Sincerely,

A Putnam County Very Concerned Resident.

Methadone clinic

Dear Governor Lee,

Hello, my name is William Szymborski. My wife and I live in Putnam County. We strongly oppose the opening of a methadone clinic in our County/city. I have many reasons for this and I will try to explain some of them here.

I was born addicted to alcohol and nicotine. Drinking and smoking started at age 5 and 8. Marijuana use began at age 13 and harder drugs soon after. I have been to a few recovery programs that had little effect on my sobriety. Not until I decided to stop doing drugs and alcohol, did I ever quit. The programs gave some useful information but failed to make me quit. I have been clean and sober for a bit over 34 years now.

My early life was surrounded with addicts of all sorts. Not a single one of them ever got clean from recovery programs.

I know a few drug addicts in the local area. Here is their opinion on the methadone program:

The first one said that all the drug addicts he has ever known think methadone is stronger and more addictive than the drugs they are trying to quit. So you are just trading one drug for another. They also said the methadone never helped them quit using drugs. It just gave them free drugs so it was harder to quit!

The second one said he thinks a methadone clinic is a good idea because he was on the program for 3 years and his father was on it too. His father died a drug addict. This guy is still using illegal drugs after 3 years of free drugs and the "recovery" programs.

These clinics are not healthy for communities. They attract drug users from outside the area. They will increase crime and lower safety in the area. The addicts that are allowed to have home treatment will very likely take the drugs as soon as they get into their cars and drive while impaired. The ones that are not allowed to take it home will be more impaired when they leave the clinic. The National Highway Traffic Safety Administration has indicated that methadone users aren't fit to

drive due to the side effects of methadone. I bet there are rules for them to not drive while under the influence of these drugs, but can we trust an addict to follow the rules? Do you want methadone impaired drivers on the road with your children, family, friends and neighbors? Law enforcement has many stories of the addicts selling their methadone to others that are addicted to it and are abusing it. They also sell it to buy their other drugs of choice.

This drug use is abused and not very successful! It is mostly drug use that is paid for by taxpayer dollars. This is only a money making business for those that run the clinics! In fact, one of the owners of the Cedar recovery center has spoken against the opening of a methadone clinic in a neighboring county. His testimony helped block that clinic from opening. Now he wants to open one of his own in our county.

Please do not approve this permit to open a methadone clinic in Putnam County.

Thank you,

William Szymborski

GOVERNOR'S OFFICE

Zerada Thomas-Morgan
5625 Dogwood Dr.
Cookeville, TN 38506

Dear Honorable Governor Lee,

I am a concerned Tennessee citizen sending you this letter to ask for your help and support in opposing Cedar Recovery Clinic or any other methadone recovery clinic from building a For Profit company that uses addictive drugs like methadone as the method to treat those addicted to opioid drugs. Giving one drug for another and telling them it will keep them from being addicted is nonsensical. These clinics are coming to our communities with Big Pharm company solutions. They have monetary interest, not the patient's interest.

Cedar Recovery has threatened to sue Putnam county, forcing a change to our zoning code to allow their clinic to be near schools and churches. The Senate passed a bill, but never made it to the house. They need not be near our schools, Churches or other places of risk.
We have NO NEED for this type of recovery clinic, because we already have several counselors, hospital, Church programs, rehab groups, faith based organizations, and recovery programs in place to take care of our community. Cookeville has real solutions that work. They keep our county and it's people safe with high recovery rates.

Simply replacing a drug for another drug is a slow downhill spiral for EVERYONE involved, including the state. People HAVE to want to truly change in order for any program to be successful. This would include a sense of self worth, being accountable for their actions and being a contributer to society. You cannot ACT supportive by dispensing a drug to them indefinitely, in place of another drug they are addicted to. We humans need so much more!

Let Tennessee be the pebble in the water that spreads waves across America to restrict these types of treatment. It would be wise if the state of Tennessee would think differently than states like California, Washington, Oregon, Colorado and several others whom already have these types of clinics, syringe safe house handouts and other money driven programs. Making people responsible for their own lives should be the base of all treatments. Allowing these types of clinics to come into our state to keep addicts hooked on drugs is like letting a robber come into your home to steal. More criminal activity will come. Just look at the states that are doing these things. Where is the improvement?? You don't need stats to see that it's not truly working. Aren't we supposed to be decreasing drug use? Why then are we allowing it to increase? We empathize with addicts, and they do need serious help but they must want to change. For those that want to be on a drug for life, need to be in house to keep others safe.

Please do the right thing and find REAL solutions to help these people. Throwing another drug at them is NOT the answer.

Thank you for taking the time to read my letter of concern.
Sincere Regards,

Zerada Thomas-Morgan

Hello,
I am a resident of Putnam County, Tennessee. I am writing as a private citizen urging you to vote in support of the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing of the application. While I borrowed much of the letter from another supporter, I absolutely understand the positive impact methadone has for addicts. Jesus Christ believed in redemption and these clinics allow us to help those less fortunate overcome addiction. My brother-in-law was addicted to opiods so I have seen addiction first hand.
Opioid addiction is a problem in our state, and empirical research studies have found methadone treatment to be effective in reducing opioid abuse and overdose. The proposed clinic in our area will provide methadone treatment for Putnam County, which provides several benefits including but not limited to:

1. **Decreasing mortality rates.** Santo et al.'s (2021) metastudy analyzed 51 research studies and included a total of over 750,000 opioid-dependent participants. The authors found the mortality rate of people in opioid agonist treatment was half of the mortality rate outside of treatment. The authors state there was a lower risk of drug-related or alcohol-related death during opioid abuse treatment. This study found methadone and buprenorphine equally decreased mortality.
2. **Preventing overdose after treatment.** Wakeman et al.'s (2020) research funded by the US National Institute on Drug Abuse compared methadone or buprenorphine assisted treatment to five other treatments including inpatient treatment and intensive outpatient interventions. Wakeman et al. reported methadone or buprenorphine treatment was associated with reduced opioid overdose compared to all other treatments. Most notably, **only** methadone or buprenorphine treatment was related to a reduced risk of overdose during 3-month and 12-month follow-ups. **No other treatment was associated with reduced overdose risk after treatment.**
3. **Decreasing local crime.** Furr-Holden et al.'s (2016) research funded by the US National Institute on Drug Abuse examined if drug treatment centers increased crime. They compared crime near drug treatment centers to crime

around businesses like liquor stores and convenience stores. The authors found that the average amount of crime near drug treatment centers was less than the average amount of crime around liquor stores, corner stores, and convenience stores.

4. **Decreasing crime by repeat offenders.** Russolillo et al.'s (2018) longitudinal study included 14,530 people with a history of incarceration and methadone use. The authors reported these participants exhibited 33% less violent crime and 35% less non-violent crime while methadone was available.

Methadone treatment saves lives and helps people recover from opioid use disorder. No studies have reported evidence to suggest that methadone treatment centers increase crime, and evidence suggests that methadone treatment decreases violent and nonviolent crime. While Putnam County does host buprenorphine clinics, there are currently no methadone clinics. Denying Cedar Recovery its Certificate of Need will limit the ability of Putnam County residents to receive care, and needlessly postpone recovery.

Sincerely,

Erin L Fough
990 Bill Smith Rd, Cookeville

Request to Be Added to the Board Members' Packet

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

- 1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

- 2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

- 3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

- 4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

Haylei B. Ooten

I am a resident of Putnam County, Cookeville….and I'd like to state that I am greatly opposed to a methadone clinic being situated anywhere in this county. I have worked in the area of addictions in the past; and my opinion is that methadone is simply another addiction that has to be dealt with.

Thank you,
Rachel Parker, CARN, ret

Re: Opposition to Certificate of Need - Cedar Recovery Methadone Clinic
1805 Burgess Falls Road, Cookeville, Tennessee

Dear Sirs,

Thank you for the opportunity to express my OPPOSITION to the proposed plan to open and operate a methadone clinic operated by CEDAR in Cookeville, Tennessee. As I am quite certain that you have received many statements regarding the proposed clinic, I will keep my remarks brief as possible and to the point.

First, as a Cookeville emergency physician of more than 32 years, Putnam County Medical Examiner and EMS Medical Director, Lieutenant for both Putnam County Sheriff Office and Cookeville Police Departments, and a consultant and lecturer for the Drug Enforcement Administration both nationally and internationally, I strongly oppose the methadone therapy proposed by CEDAR for the intended Cookeville facility. Methadone is an old drug, with multiple confounding drug interactions and risks not found in other narcotic addiction treatments. It is my considered opinion that methadone should be withdrawn from active use in both narcotic addiction and chronic pain treatment therapies. Specific to methadone, there are potential life threatening cardiac complications, especially when combined with particular, commonly prescribed medications. The CON application remains silent to these potential complications and any

plans to address same. Additionally, methadone was more commonly encountered in Cookeville and Putnam County when pain clinics were common and much less regulated. Methadone has a particularly long onset of action after ingestion (30-60 minutes), and it has a much longer duration of action (4-6 hours, which is known increase to around 2 days with repeated administration and/or overdosage). Because of these pharmacokinetics, a methadone "dose" is easily considered ineffective and then repeated, perhaps more than once, until it all catches up with that person who ingested the methadone with dire, too often deadly, consequences. With improved control of local pain clinics, issues in our community related to methadone faded and it became a much scarcer street drug. Local deaths and overdoses involving methadone dropped significantly.

Second, the CON as proposed only has one indigent patient included in treatment for the first year, and another single patient for year two. It is unclear to me if that means another indigent patient for year two, or whether that is the same patient who remains in the treatment program. This is significant and critically important when considering the overall financial picture of the clinic as submitted in the CON application. In the CON application, charity care represents only 1 per cent of care proposed in both 2025 and again in 2027. This is remarkable especially when the financial make up of the population is described in the CON application as low median household income, high poverty, and high TennCare. One patient per year would appear to exclude many, based solely upon ability to pay while the revenue for the clinic is projected to be $442,541 in 2025, and $1.89 million in 2027. This contrasting interest in paying patients when compared to indigent patients speaks volumes about the true plan of the clinic. It appears that the intent is to care for those who are able to pay while caring for those unable to pay only to the level that meets imposed requirements rather than true needs. The CON indicates that CEDAR while rely on State Opioid Response Grant funds. It should be noted that CEDAR already receives State Opioid Response Grant.

Please note that Dr Loyd chairs the committee appropriating these funds from the Tennessee Department of Mental Health and Substance Abuse Services, where Dr Loyd also serves as Deputy Commission for Substance Abuse Services.

Third, at a recent Putnam County Commission meeting where the Commission considered the proposed CEDAR treatment facility, six individuals spoke to the Commission about CEDAR. I was one of those who spoke. Notably, I asked those in the audience which I estimate exceeded 200 people to stand if they opposed the proposed CEDAR methadone clinic in Putnam County. As best I could tell, all in attendance, excepting the 3 CEDAR staff members present, stood to express opposition to the proposed clinic.

And last, as I am sure others have pointed out in other correspondence, the location of the proposed clinic is in close proximity to churches, schools, a gun store, a business park, and perhaps most remarkably, would literally share the building with an athletic facility for children.

In closing, I appreciate your thoughtful and careful consideration in this matter. It is my prayer that you DENY this application by CEDAR for the proposed Putnam County methadone clinic. I am and remain available to you at your convenience

should the need arise in this or any other matter before the Board.

Respectfully,

Sullivan Smith, MD FACEP

Nashville, TN 37243

Dear Members of the Tennessee Health Facilities Commission,

I am writing to express my strong opposition to Cedar Recovery's application for a Certificate of Need to open a methadone clinic at 1805 Burgess Falls Road in Putnam County. While I understand the importance of providing treatment options for those struggling with opioid addiction, I believe that the establishment of a methadone clinic in this particular location will have negative consequences for our community.

Methadone, while an effective treatment for some, carries significant risks. It is a powerful synthetic opioid that can lead to dependence and, in some cases, severe side effects. The drug's potential for misuse and the difficulty many patients face in eventually tapering off methadone can make it a double-edged sword. Additionally, methadone-related overdoses remain a serious concern, especially when it is not administered or monitored correctly.

As residents of Putnam County, we are deeply concerned about the impact this clinic could have on the safety and well-being of our community. The proposed location is near residential neighborhoods and areas where children play and attend school. Introducing a facility of this nature could potentially attract individuals with substance use disorders, increasing the risk of crime and other related issues in our otherwise peaceful and close-knit community.

Our concerns extend beyond just the presence of the clinic. Methadone is often prescribed in increasingly larger quantities as rapport is built between patients and providers. This can lead to the drug being diverted and sold illegally, exacerbating the very problem it is intended to treat. Communities where methadone clinics are established have reported instances of methadone being sold on the streets, contributing to a cycle of addiction and crime that we do not want to see in our home.

We have worked hard to build a safe and supportive environment for our families, and a methadone clinic does not align with the values we hold dear. Instead of enhancing our community, it would likely bring challenges that we are neither equipped nor prepared to handle.

I respectfully urge the Tennessee Health Facilities Commission to consider the concerns of our community and deny Cedar Recovery's application for a Certificate of Need. We are committed to supporting those in need of treatment, but we believe that this location is not appropriate for such a facility. We hope that alternative solutions can be explored that do not compromise the safety and integrity of our community.

Thank you for your attention to this matter.

Sincerely,

Brianna Qualls

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Good evening all,

My name is Kailey West and I am a resident of Putnam County. I am emailing you tonight to express my opinion and concern for the Methadone Clinic that is being proposed. My daughter goes to Jumping Jelly Beans Daycare right down the road from the proposed site. I am deeply concerned about not only her safety regarding the possible clinic, but also her health. We don't know any short term or long term side effects of this. My daughter's health and safety mean everything to me along with the children and families that live around the area. I'm concerned about how this will affect not only our community but our county and what kind of individuals it may bring into the area of families near childcare centers, businesses, and peoples homes. This is not something to be taken lately, I am extremely concerned about what it will look like if this clinic is approved to be in Putnam County especially near my child's daycare center. I will not feel safe as a county Resident with this clinic in place. My family lives 10 minutes from the proposed site and it is scary to think about. I do not want my daughter and my future children to be put in this position. I don't want this to affect my family's health or safety. I do not believe that this clinic should be approved for multiple reasons of stated above.

I hope my email is taken into consideration when it comes time to boating. I hope everyone thinks about not only the county itself, but also the residents and children that go to daycare not even a mile away from the proposed site.

Thank you for your time and consideration reading my email.

Kailey West

Methadone clinic

Mr. Phillip Earhart,

Hello, my name is William Szymborski. My wife and I live in Putnam County. We strongly oppose the opening of a methadone clinic in our County/city. I have many reasons for this and I will try to explain some of them here.

I was born addicted to alcohol and nicotine. Drinking and smoking started at age 5 and 8. Marijuana use began at age 13 and harder drugs soon after. I have been to a few recovery programs that had little effect on my sobriety. Not until I decided to stop doing drugs and alcohol, did I ever quit. The programs gave some useful information but failed to make me quit. I have been clean and sober for a bit over 34 years now.

My early life was surrounded with addicts of all sorts. Not a single one of them ever got clean from recovery programs.

I know a few drug addicts in the local area. Here is their opinion on the methadone program:

The first one said that all the drug addicts he has ever known think methadone is stronger and more addictive than the drugs they are trying to quit. So you are just trading one drug for another. They also said the methadone never helped them quit using drugs. It just gave them free drugs so it was harder to quit!

The second one said he thinks a methadone clinic is a good idea because he was on the program for 3 years and his father was on it too. His father died a drug addict. This guy is still using illegal drugs after 3 years of free drugs and the "recovery" programs.

These clinics are not healthy for communities. They attract drug users from outside the area. They will increase crime and lower safety in the area. The addicts that are allowed to have home treatment will very likely take the drugs as soon as they get into their cars and drive while impaired. The ones that are not allowed to take it home will be more impaired when they leave the clinic. The National Highway Traffic Safety Administration has indicated that methadone users aren't fit to

drive due to the side effects of methadone. I bet there are rules for them to not drive while under the influence of these drugs, but can we trust an addict to follow the rules? Do you want methadone impaired drivers on the road with your children, family, friends and neighbors? Law enforcement has many stories of the addicts selling their methadone to others that are addicted to it and are abusing it. They also sell it to buy their other drugs of choice.

This drug use is abused and not very successful! It is mostly drug use that is paid for by taxpayer dollars. This is only a money making business for those that run the clinics! In fact, one of the owners of the Cedar recovery center has spoken against the opening of a methadone clinic in a neighboring county. His testimony helped block that clinic from opening. Now he wants to open one of his own in our county.

Please do not approve this permit to open a methadone clinic in Putnam County.

Thank you,

William Szymborski
3575 Long Lane Road
Cookeville, TN 38506

Health Facilities Commission
Andrew Jackson Building 9th Floor
502 Deadrick Street
Nashville, TN 37243

My name is Erika Robinson. My husband and I relocated to Putnam County in 2022 after prior time spent in northern California. We purchased a home in a subdivision about 1 mile from Burgess Falls Rd. Part of the reason we chose to live in this area is that it is rustic, peaceful, yet still accessible to many of the amenities in Cookeville and neighboring cities and within reasonable driving distance from Nashville, Knoxville and other larger metro areas.

We are very concerned about the proposed building of a methadone clinic in our neighborhood and oppose Cedar Recovery's plans to open this facility in Putnam County. Having become familiar with resources and services for those looking to overcome opioid addiction, we learned that Cedar already has a facility approximately half a mile away in Cookeville from the planned location for this new clinic, deeming it unnecessary to install another similar facility in such close proximity. Those within Putnam County and neighboring counties who are seeking such a service already have this Cookeville location. Within another mile of this facility is Spero Health which provides addiction treatment. There is also Bicycle Health and numerous other facilities and organizations that offer these services. There are more than enough places where addiction treatment assistance is being provided that are readily accessible to Putnam County residents that there is no justifiable need to further disrupt a peaceful community with another facility.

It is also concerning to us that the state would even consider allowing another similar facility to be established right next door to a business that regularly serves children. Elite provides athletic training and programs for children and is next door to the space where Cedar Recovery is trying to establish its clinic. It is unacceptable to have children in a setting where they could be interacting with addicts and the potential dangers that could occur from those with nefarious agendas who wish to make exchanges for medication provided to those seeking services or target the facility to steal the drugs within for resale. There are also the inherent risks of those who are impaired driving and engaging with children and their families. Beyond Cedar Recovery not being able to demonstrate need for this new clinic in our community, putting children in harm's way is not something we support.

We do not support the approval of Cedars CON to expand their business in our community with the opening of a 2nd facility in Putnam County and want them to take their business elsewhere.

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

State of Tennessee

I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

Deborah Clouse ~ Don Clouse

To Whom It May Concern:

I hope this letter finds you well. I am writing to express my strong opposition to the proposed relocation of the methadone clinic to our Putnam County community. While I understand the necessity of providing treatment options for individuals struggling with addiction, I have significant concerns regarding the potential impact this move may have on our neighborhood.

First and foremost, the primary concern is the safety and security of our residents. Methadone clinics often attract a high volume of individuals with substance use disorders, which can increase the likelihood of drug-related activities and crime in the surrounding areas. The location of the proposed clinic is primarily residential, with many families and children living here. The presence of such a clinic could jeopardize the sense of safety that we currently enjoy.

Most importantly, my son's daycare, a youth baseball training facility, and a homeschool learning center are within a one (1) block walking distance of the proposed location. I am particularly concerned about the clinic's proximity to my son's daycare. As a parent, the safety and well-being of my child is my top priority. The possibility of exposing young children to individuals who may be under the influence or involved in drug-related activities is deeply troubling. The daycare is a place where children should feel safe and protected, and the presence of a methadone clinic nearby could undermine this environment.

Additionally, property values in the area may be negatively affected. The stigma associated with drug treatment facilities can deter potential homebuyers and investors, leading to a decline in property values. For many of us, our homes represent our most significant financial investment, and we are concerned about the potential for depreciation.

Furthermore, the clinic's relocation could strain local resources and infrastructure. Increased traffic and parking demands, as well as the potential need for additional law enforcement and emergency services, could burden our already limited resources. This strain could diminish the quality of life for all residents and small business owners in that area.

While I acknowledge the importance of providing support and treatment for individuals with addiction, I believe there are more suitable locations for the clinic that would not negatively impact residential areas. I urge you to consider alternative sites that are better equipped to handle the unique challenges associated with a methadone clinic. Putnam County is a tight-knit, well-loved, community with a hometown heart. This is not a community in need of a methadone clinic. At minimum, the location of the clinic needs to be re-evaluated.

Thank you for your attention to this matter. I look forward to your response and hope to work together to find a solution that benefits both the individuals in need of treatment and our community as a whole.

Sincerely,

Ashley Lauren Huffman,

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:
I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

- 1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

- 2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.
- 3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.
- 4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.
Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

Cynthia Garrett

Tennessee Health Facilities Commission Board,

I strongly oppose Cedar Recovery opening a facility in Putnam County. There are already several treatment facilities in the area including, Murfreesboro, Nashville and Knoxville. My husband and I, as well as many of our family, friends and neighbors travel to these places for specialized care. Individuals who think that they can benefit from this type of treatment, can do that as well. We do not need this type of facility in Putnam County.

Sincerely,

Pamela Hendrick

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely, Alice Kelly

I do not want the to happen in my community where are daycare people lived there a long time I pray this will not happen

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. To Whom It May Concern,

I hope this letter finds you well. I am writing to express my deep concern and strong opposition to the proposed establishment of a methadone clinic in our community. While I fully acknowledge the critical role that such clinics play in addressing the opioid crisis and supporting individuals in their recovery journeys, I firmly believe that our community is not the appropriate location for this facility.

Our community is characterized by its family-friendly environment, with numerous daycares, schools, churches, parks, and recreational facilities that serve as hubs for our children and families. The presence of a methadone clinic in close proximity to these areas raises several significant concerns that must be addressed:

1. **Safety and Security**: The introduction of a methadone clinic could attract a high volume of individuals struggling with addiction to our neighborhood. This influx has the potential to increase the risk of drug-related activities, crime, and disturbances, posing a threat to the safety and well-being of our residents, especially our children and elderly.
2. **Impact on Property Values**: Numerous studies have shown that the presence of drug treatment facilities can lead to a decline in property values. Our community members have invested their hard-earned money into their homes, and a decrease in property value would be a significant financial burden for many.
3. **Community Character**: Our community prides itself on its peaceful and cohesive character. The introduction of a methadone clinic could fundamentally alter the fabric of our community, leading to a shift in the demographic and a potential increase in social tensions and stigmatization.
4. **Alternatives and Location Suitability**: It is crucial to consider alternative locations for the methadone clinic that would be better suited to serve those in need without compromising the integrity of a residential neighborhood. Urban centers, medical districts, or areas with existing support infrastructure for addiction recovery would provide a more appropriate setting for such a facility.

I want to emphasize that my opposition is not rooted in a lack of compassion for those struggling with addiction. On the contrary, I fully support efforts to provide comprehensive treatment and rehabilitation services. However, it is essential to balance the needs of those seeking recovery with the legitimate concerns of community residents.

I urge you to reconsider the location of the proposed methadone clinic and explore alternative sites that would be more suitable for this type of facility. Let us work together to find a solution that addresses the needs of all parties involved, ensuring the safety, stability, and continued prosperity of our community.

Thank you for your time and consideration. I look forward to your response and to working collaboratively towards a resolution that benefits everyone.

Sincerely,

J. S. Francis, Sr.

Dear Logan Grant,

Enclosed please find additional letters against the proposed Methadone Clinic at 1805 Burgess Falls Rd, Cookeville, TN. I'm a committee member for Citizens Against Methadone Clinic. We (almost entire county of Putnam), are strongly opposed to the Certificate of Need - Cedar Recovery.
Please add these letters to the ones you've already received, adding them to the Board Members' Packet.
Thank you,
Sincerely,
Janice H. Stevens

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:

I am a resident of White County, Tennessee. I am tremendously concerned about a proposed methadone clinic in the county adjacent to mine – Putnam County. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

State of Tennessee

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:

I am a resident of ~~Putnam~~ white County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

From: Linda Smith
909 Franklin Court
Cookeville, TN. 38506

Dear T.H.F.C. members,

The purpose of this letter is to express my vehement opposition to the establishment of a Methadone clinic in Putnam County ... as for that matter, I oppose such a facility anywhere in our adjoining 12 Upper Cumberland area.

I am adament my written opposition be registered with the T.H.F.C. as well as placed in the Cedar Recovery Board member's packets concerning their CON application. I will add my vocal objection during your Commission Meeting Wed. Aug. 28th.

My objections to such an establishment are many and varied. Personally, my major concern is the:
(1) exposure of my family; children, grandchildren, and great grandchildren, all of whom live, work, play and worship within a 5 mile radius of their proposed site at 1805 Burgess Falls Road, to addict's lack of self control, erratic behaviors, indiscretions, and the potential dangers narcotic addicted persons present;
(2) exposure of these and other youth who are involved in sports training experiences being conducted in the same facility to drug addicted individuals.
(3) exposure to the obvious safety dangers the presence of such individuals in narcotic-laced conditions as they utilize the very busy, very crowded Burgess Falls roads, and other facilities as they access & exit the proposed clinic which is close proximity to small businesses, child care centers, churches and schools as well as numerous neighborhoods.
(4) The very presence of an "approved" treatment clinic has grave potential to lure susceptible youth/individuals who could view this drug-addiction "treatment" facility (should such persons succumb to pressure to use any narcotic) to think a clinic like this would be

available to "help solve" their drug use when we KNOW this type of facility does not cure addiction, but in fact, basically serves as a maintainance device, continuing dependence upon another powerful, addictive drug that, in itself, presents an even more extremely difficulty and a lengthy withdrawal !!!

On a second realm - and just as significant as my first Concern - (1) is the impact such a facility has on a community and its taxpayer's dollars being utilized basically to a for-profit organization and on-going addictions to another powerful drug. I strongly disagree on this aspect.

(2) I disagree also with the use of public funds to provide transportation of addicts from the larger 12 County area into Putnam County. Addicts who have access to their own transportation present a very real & present dangers to other drivers. Thousands - millions of accidents are caused by narcotic-driven drivers resulting not only in loss of life but resulting in untold damage & cost. My brother was killed by one of these drivers.

(3) As a Florida resident, one who also owned property in the Florida Keys, I witnessed first hand many additional dangers by the presence of addicts. Addicts recieving Methadone would crowd sidewalks for hours prior to and following the clinic's opening & would "hang-around" and/or stay in self-created shelters to be near their "clinic". Home break-ins, burgularies, store robberies & assults, all requiring more police presence, adding to residents tax burdens and safety concerns. Such incidents increased dramatically from times before it's opening. This same scenario repeats itself wherever a "treatment" Center opens. Putnam County WILL NOT become another San Francisco !!

Finally, I am firmly in opposition to this facility because there are other medical services in Putnam County that deal with similiar needs. Why would we propose to or agree to further burden law-abiding tax payers? This LLC provides a dangerous facility that Putnam County citizens loudly and clearly reject.

I, therefore, implore all decision Makers to resoundly and firmly reject Cedar Recovery of Middle TN's Certificate of Need. Anyone's support of this facility is enabling our Country's support as a drug Cartel!! Please listen to the voices of our very Concerned citizens. Reject this For Profit firm's CON.

Yours truly,
Linda Smith

Cookeville, TN 38506

Dear T.H.F.C. members,

The purpose of this letter is to express my vehement opposition to the establishment of a Methadone clinic in Putnam County ... as for that matter, I oppose such a facility anywhere in our adjoining 12 Upper Cumberland area.

I am adament my written opposition be registered with the T.H.F.C. as well as placed in the Cedar Recovery Board members' packets concerning their CON application. I will add my vocal objection during your Commission Meeting Wed. Aug. 28th.

My objections to such an establishment are many and varied. Personally, my major concern is the: (1) exposure of my family, children, grandchildren, and great grandchildren, all of whom live, work, play and worship within a 5 mile radius of their proposed site at 1805 Burgess Falls Road, to addict's lack of self control, erratic behaviors, indiscretions, and the potential dangers narcotic addicted persons present;
(2) exposure of these and other youth who are involved in sports training experiences being conducted in the same facility to drug addicted individuals.
(3) exposure to the obvious safety dangers the presence of such individuals in narcotic-laced conditions as they utilize the very busy, very crowded Burgess Falls roads, and other facilities as they access & exit the proposed clinic which is close proximity to small businesses, child care centers, churches and schools as well as numerous neighborhoods.
(4) The very presence of an "approved" treatment clinic has grave potential to lure susceptible youth/individuals who could view this drug-addiction "treatment" facility (should such persons succumb to pressure to use any narcotic) to think a clinic like this would be

available to "help solve" their drug use when we KNOW this type of facility does not cure addiction, but in fact, basically serves as a maintainance device, continuing dependence upon another powerful, addictive drug that, in itself, presents an even more extremely difficulty and a lengthy withdrawal !!!

In a second realm - and just as significant as my first concern - (1) is the impact such a facility has on a community and its taxpayer's dollars being utilized basically to a for-profit organization and on-going addictions to another powerful drug. I strongly disagree on this aspect.

(2) I disagree also with the use of pubic funds to provide transportation of addicts from the larger 12 County area into Putnam County. Addicts who have access to their own transportation present a very real & present dangers to other drivers. Thousands - millions of accidents are caused by narcotic-driven drivers resulting not only in loss of life but resulting in untold damage & cost. My brother was killed by one of these drivers.

(3) As a Florida resident, one who also owned property in the Florida Keys, I witnessed first hand many additional dangers by the presence of addicts. Addicts recieving Methadone would crowd sidewalks for hours prior to and following the clinic's opening & would "hang-around" and/or stay in self-created shelters to be near their "clinic". Home break-ins, burgularies, store robberies & assults, all requiring more police presence, adding to residents tax burdens and safety concerns. Such incidents increased dramatically from times before it's opening. This same scenario repeats itself wherever a "treatment" center opens. Putnam County WILL NOT become another San Francisco !!

Finally, I am firmly in opposition to this facility because there are other medical services in Putnam County that deal with similiar needs. Why would we propose to or agree to further burden law-abiding tax payers? This LLC provides a dangerous facility that Putnam County citizens loudly and clearly reject.

I, therefore, implore all decision Makers to resoundly and firmly reject Cedar Recovery of Middle TN's Certificate of Need. Anyone's support of this facility is enabling our Country's support as a drug Cartel!! Please listen to the voices of our very Concerned citizens. Reject this For Profit firms CON.

Yours truly,
Linda Smith

Greetings,

I am writing in opposition to the purposed Methadone Clinic in Cookeville Tn.
There are many reasons why so many in our area are opposed to this.

I'm not sure how to rank them so I will just state them in no particular order.

The proposed site is in the same building that houses a sports type complex for our youth
in this area.

There are churches, daycares, and schools near the proposed site. If this was a store selling alcohol or "pub" of any sort it would be immediately rejected
in Putnam County by our local Beer Board.

It is also somewhat residential in nature in its proximity to single stand alone
homes and also subdivisions. To be fair there are commercial facilities near as well.

The building fronts a state highway which is very well traveled and probably too often at speeds
not conducive to the area or this type of operation.

There is a mental institution no more than one half mile from the proposed site.

The proposed site is less than a mile from Interstate 40 which in and of itself
is a major concern.

If treatment is sought by addicts there are many facilities already is place in Cookeville, Putnam County and
surrounding cities and counties that offer treatment by means other than giving a substitute drug.

Cookeville is a "Hub" for the Upper Cumberland area and draws thousands per day.
It will be a draw for those seeking this Legal Drug. It won't be like driving across town
as is the case in larger cities but traveling major, minor, winding, curvy, mountainous,
and narrow roads to get here. Who knows what condition they will be in while they are coming here or leaving here.

There is the very real possibility that some forms of this drug can be sold in the parking lot before
leaving the facility or taken and distributed anywhere. The argument can be made that they at the clinic will
control usage by "on site" supervised ingestion. Maybe so, but in the event, they distribute and let
the user leave the site with product it is no longer controlled.

It is my opinion that Methadone is nothing more than an addictive drug that is legal and
is distributed by legal merchants. Legal drug dealers recruiting clients for long term
clients.

The very definition of Methadone is scary and concerning.

I am a retired Putnam County Sheriff and am very familiar with the devastating effects
illegal drugs impose on our society. I have dealt in the past with a vast array of problems arising
from the trafficking in the drug user world.
Many problems are brought about in my opinion by these clinics.
One particular incident arose many years ago after two people from our area went to a clinic in or near Chattanooga Tn.
When they returned to Cookeville from Chattanooga one of those involved shot the other.
Simply because time has passed, I cannot quote all that was learned from that incident
but do remember those involved were in that situation as a result of

their trip to the clinic.

I suppose it is clear that I oppose this clinic being located anywhere in Putnam County.
It does not in any way add to the health and wellbeing of our community and its citizens, in my opinion.
As a former Law Enforcement Officer, I fear this coming to our community.

I ask you to consider my opinion as well as the many others who have reached out to you in
opposition to this facility. We do not need or want it.

Thank you for your time and consideration.

Sincerely,

David K. Andrews

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a few reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a “drop” for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility “where they are not wanted.” With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

Doug Robinson

I'm keeping it short and simple. I am a tax paying citizen in Cookeville Tennessee and am very opposed to this clinic coming to our town! Nothing positive will come from this methadone clinic in our town.

Thank You,

Dear Mr. Earhart,

I would like to express my extreme concerns regarding the discussion of a methadone clinic being placed in Putnam County. As a native of Putnam County for 56 years, I have recently witnessed an unfortunate change in the demographics and safety on our streets. Cookeville is experiencing an influx of people who are wandering the streets, some who are committing crimes in the area, soliciting, setting up camps, and littering in areas. Unfortunately, a methadone clinic would contribute additional concerns and is strongly opposed in our community.

As a retired educator, I am aware of the effects of drugs on children and their families. I am also aware of the research on the ineffectiveness of methadone clinics, often resulting in the selling of methadone in the community rather than helping individuals with addictions. I am opposed to a methadone clinic being placed anywhere in our community. That

being said, the proposed placement of this particular clinic is 1.4 miles from my 88-year-old mother's home (who has dementia). I ask you to consider how a clinic such as this would add fear and anxiety to nearby neighborhoods, schools, stores, parks, and other public and private properties, in addition to decreasing property values. Would you buy a home or want your children to attend a school near a methadone clinic? Please consider this for our community.

We hope to see Putnam County remain as a beautiful community which thrives with new schools, opportunities, and a safe environment in which to raise a family--the one I experienced in Cookeville as a child and the one in which my husband and I raised our daughters.

Please kindly consider the multitude of requests in opposition of a methadone clinic in Putnam County. Also, please add my letter of opposition to the Board Members Packet for Cedar Recovery.

Thank you for strongly considering the denial of a Certificate of Need for a methadone clinic in Putnam County.

Sincerely,
Mindy Lloyd

Re: Opposition to Certificate of Need -Cedar Recovery
Methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee
Request to Be Added to the Board Members' Packet

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the

clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

To the Tennessee Health Facilities Commission and Cedar Recovery:

I am writing to express my strong concerns regarding the proposed establishment of a methadone clinic at 1805 Burgess Falls Road, in Cookeville TN.

While I understand the importance of addressing opioid addiction and supporting individuals in recovery, I believe there are significant issues with placing this clinic in our community. First and foremost, the location of the proposed clinic is within close proximity to several schools and family-oriented businesses: within 1,135 feet of a homeschool umbrella office, 1,250 feet from Jumping Jelly Beans Daycare, 2,000 feet from Parkview Elementary School, 2,500 feet from a business park, across the street

from a gun shop, and in the SAME BUILDING as 931 Elite Sports Training, a facility for local children! This raises concerns about the safety and well-being of our children and families, who will be exposed to potentially disruptive and dangerous situations.

And despite claims from Cedar Recovery that their hours of operations won't impact the children at 931 Elite, and won't impact the traffic in the same parking lot that they will share, we have heard again and again from local law enforcement, from former addicts, from CURRENT addicts, that hours of operation will not mean a thing to desperate addicts needing their drug, from addicts who choose to not follow the rules, regulations, and policies that they are expected to adhere to. They are already addicts – they are users of illegal and illicit drugs. They cannot be expected to follow policy – instead we can expect them to do what law enforcement and actual addicts say they will do – they will be on the search for drugs, or money for drugs. They will hang out in or around the parking lot, waiting for drugs. They will sell and buy drugs in and around the parking lot. And they will do this at all hours of the day, not just during the posted operating hours at Cedar Recovery.

In addition to the safety and well-being of our children and our community, the presence of a methadone clinic may impact property values and the overall attractiveness of our neighborhood. This could affect local businesses and create further economic challenges for our homeless as well as residents.

We have multiple avenues to treat opioid addiction here already – not just in Putnam County, but right in the city of Cookeville. Multiple alternative locations that better serve the needs of those seeking treatment while minimizing potential disruptions to the community. Know your audience! I have attended weekly meetings since hearing of this proposed disaster. THOUSANDS of Putnam County residents are resisting this. We have met with Law Enforcement including Putnam County Sheriff Eddie Farris, City and County Commissioners, Putnam County Mayor Randy Porter; all are strongly opposed. Our very good friends in Overton County, in the little town of Rickman are also opposed.

We do not have a need for a methadone clinic here, but it is apparent that Cedar Recovery has a need to profit from the opioid epidemic – an epidemic that can be treated by existing treatment centers. Their greed and need to feed off the helplessness and sickness of others is vile and should not negatively impact the quality of life for local residents. We currently have 4 non-residential Office-Based Opiate Treatment Centers in Cookeville. Cedar Recovery is one of them, already active in our town. Do they need a second facility? One that draws the anger and concern of the community? One that thousands of people have protested against?

Additionally, we have over 50 Faith-Based Recovery Groups that are certified through the State of Tennessee Mental Health System. Faith based is TREATMENT based, not

substitution based. Between the medicine-based options, and the faith-based options, our needs are met. We DO NOT want or need a methadone clinic in Putnam County. This hearing for a Certificate of Need is based on money. It is based on greed. It is not based on what the Citizens of Putnam County want nor our neighbors need. And if you pass this application for the Certificate of Need, please be aware that the first time a child is injured, the first time a grandma is driving down Burgess Falls Road and gets in a car accident with a drug user who uses the Cedar Recovery facility, the first time a house or car is broken into and theft or injury occurs because of an addict that either is a patient at Cedar Recovery, or has been seen in or around the parking lot of the proposed facility – please trust that any member of the commission who voted for this will be held accountable. There are exceptions to the sovereign immunity that you may feel so safe under – but know that if any of the above happens, and you have willingly brought this to our town knowing the impact it could have on our community, I doubt very much that you will be immune from our claims. And if you are, Cedar Recovery won't be – Joe Bond, Stephen Loyd, Paul Trivette… the list goes on.

I respectfully request that you reconsider the decision to place the methadone clinic at this location and engage with the community to find a more suitable site. I am confident that with careful planning and community involvement, we can find a solution that balances the needs of those in recovery with the well-being of our neighborhood.

Thank you for your attention to this matter. I look forward to attending the CON meeting on Wednesday, August 28th . I hope for a solution that respects the concerns of all stakeholders involved: a vote against the application for the Certificate of Need.

Sincerely,

Patricia Saso

Putnam County Resident

Hello,
My family and I live in Cookeville Tennessee and we oppose Cedar Recovery's intent to open a Methedone Clinic in Putnam County or anywhere near our county.
Thank you for hearing and helping us keep this drug from being available here.
Thank you,

Dear Sir,

As a follow up to my previous email (see below), I would urge you to look up on-line the following information: "Mass and Cass, Boston, MA."

You will see a large Photo Selection of the areas providing drug treatment and homeless shelter facilities in a once thriving section of the city.

I fear providing similar facilities in TN, such as a Methadone Clinic, would bring the same type of catastrophic disruption and disaster to your communities.

James Drury

> **From:** JAMES DRURY <shsports@aol.com>

> **To:** phillip.m.earhart@tn.gov
> **Subject: Methadone Clinic**
>
> Dear Sir,
>
> I am a retired Boston Special Police Officer who recently moved to Baxter, TN a year ago, August, 2023.
>
> Prior to my retirement I was often assigned to provide security at the Methadone Clinic in Boston located in proximity to a section referred to by the Boston press as "Mass & Cass", a notorious area populated by drug addicts, dealers and homeless persons.
>
> The Methadone Clinic provided services to clients from 6:30 AM to 12:00 noon and two uniformed officers were assigned duties there from 6:00AM to 12:30

PM.

A permanently assigned officer worked inside the Clinic and a detail officer provided security outside the building. Both officers controlled the entry and exit of clients by police radio throughout the assignment.

Lines would form outside as early as 6:00 AM and at 6:30 a small group of 8 to 10 clients would be allowed into the clinic to be seen, usually by 3 to 4 nurses, who would administer the methadone dosage. As each dosed client exited the clinic one waiting client in line would be allowed in.

Lines outside the clinic would range, throughout the morning, from 10 to 30 or more clients whose movements and behaviors were controlled and observed by the outside officer. Drug deals and exchanges were often observed or suspected in the adjoining parking areas as well as in the waiting lines.

A good number of clients openly admit "Methadone is just another drug, until they get something later!" Very few clients get weaned off Methadone and they often complain, claim illness and/or cause disruption when dosages are minimally reduced.

A Methadone Clinic, will likely require a Director, an Assistant Director, a Doctor, a Head Nurse and professionally trained nurses to administer doses as well as the cost of providing security for workers and clients.

These high cost professional salaries will be a major expense to taxpayers and provide an incentive for management to keep and maintain a continuous high level client base.

Additionally, there will be considerable costs in maintaining a useful building, water, sewage, cleaning ,maintenance and parking facilities.

In many cases a three month prison sentence would yield more drug recoveries than an over expensive and largely unsuccessful Methadone program.

Yours Truly,
James F. Drury

Please add this letter to the Board Members' packet.

To the Tennessee Health Facilities Commission:

I am a resident of Putnam County and this letter reflects my opposition to the establishment of a Cedar Recovery methadone dosing station at 1805 Burgess Falls Road, Cookeville, Tennessee. The decision to establish a methadone program at this specific location is reckless and will create unsafe conditions for the children and families that use that building, and quite possibly for those seeking methadone there. This contradicts certain assertions set forth in Cedar's Certificate of Need application in the Quality Standards section of the application, in addition to further mischaracterizations in the Need section of the application. Accordingly, Cedar has failed to meet CON requirements, and this application must be denied.

QUALITY STANDARDS

Simply put, it seems Cedar will say and do anything to get a methadone site in the Cookeville area. So desperate are they to get into Cookeville they are willing to select the most morally hazardous, inappropriate, and risky location for their project. They seek to share building space and a small parking lot with a girls' softball and gymnastics center as well as boys little league teams. Often in a case like this a dose center can't have its front door within 1500 feet of a children's facility. Yet Cedar intends to literally place its front door about 25 feet away from the same door where grammar school kids walk in and out. This doesn't reflect intelligent commercial behavior. It reflects the extreme recklessness of Cedar's leadership and decision-makers. Cedar knows this location's unique community of young children and families presents a truly dangerous externality in this project and in effect it is tossing this issue into your lap. Consequently, the risk of harm befalling children must be at the forefront

of your decision-making process, specifically given the location of this facility.

In the mind of Cedar, concern for the children directly affected by their plan is disregarded as "NIMBY."

How arrogant and dismissive. Consider this from page 33 of the CON application:

"Being a Good Community Partner:

Cedar Recovery met with the County Mayor and the District Attorney General of Putnam to discuss the proposed OTP and this project. The Mayor advised Cedar of the number of calls he received opposing this type of treatment program; most of which were "not in my backyard (NIMBY)" arguments."

What can you infer of a company that derisively diminishes family concerns for their young children? Haven't we seen enough disregard of the value of our children?

And being a Cedar "Good Community Partner" will not include stakeholders from the Putnam Mayor, District Attorney and Sheriff's Offices. Additionally, Cedar completely disregarded such Putnam County stakeholders as the Presiding Judge Wesley Bray of the 13th Judicial Circuit of Tennessee, and 13th Judicial Circuit judges from the Criminal Court Judges Shawn Fry and Gary McKenzie, and from the Circuit Courts Will Ridley and Caroline E. Knight, as well as Judge Julie Chambers form the Recovery Court. Furthermore, Chamber of Commerce President and CEO Amy New was disregarded as well as Chamber of Commerce Staffer Adam Poe representing the Highlands Economic Partnership. You will see the affidavits they, and others, signed when they are presented before you on August 28th.

That the County officials ignored elements of the "Being a Good Community Partner" is no mistake, but it is a reflection on the lengths Cedar will go to rapidly gain access to this location. And we contend this indicates Cedar has not satisfied the Quality Standards of the CON application.

NEED

The Need analysis is largely supported by "projections" and specious conjecture dependent upon conclusory assertions. For example, here Cedar dismisses "alternative treatment modalities" as "insufficient" to meet need while admitting unmet need is still less for methadone treatment.

According to Cedar Recovery at CON page 21: "*These alternative treatment modalities are likewise insufficient to meet the need for opioid addiction treatment in the PSA ... Although the unmet need is slightly less than for Methadone treatment…."*

"Alternative treatment modalities" alludes to faith-based treatment programs of which there are many successful examples in Putnam County. Such alternative modalities of course are anathema to Cedar as they do not align with their profit treatment modality. We contend that the faith-based treatment programs are sufficient and effective in meeting PSA need. And importantly, the scant hope Cedar provides with methadone treatment does not satisfy CON Need.

You may be familiar with the town hall held by Cedar in Rickman, Overton County. So clear was the community response from the Rickman attendees, the Cedar team cut and ran, determined they would not face another Town Hall. Like the Overton community, Cookeville and the Putnam community reject their business model. As we border Overton you could say we are shoulder to shoulder with our neighbors. Yet Cedar feels free to decouple our position from Overton:

Cedar has not encountered the level of vitriol in Putnam County as it did in Overton County. (Emphasis supplied). page 126, 1N Criterion 8.

Cedar hasn't sampled the "vitriol" of Putnam County because they abandoned the Town Hall format. For all the assertions of commitment to "Community Linkage" Cedar ensured there would be none by refusing to engage in an open forum with the locals. They know their business model is not needed or wanted here.

Be assured from what I have learned about this community is if one little child, one little girl or boy, gets hurt in any way consequent to the establishment of this dose center, there is no insurance or regulation, or qualified immunity to protect against the lawsuits and brutal publicity that will follow Cedar across the board. If they held a Town Hall here, they would know that.

We surmise they know their product does not provide much wellness to the community and they are purely pushing this for the money. After all, this is a growth industry worth nearly $70 million today expected to reach nearly $90 million by 2030.

Clearly Cedar does not care for the Cookeville area.

Sincerely,
Richard Morseman

Tennessee Health Facilities Commission
Andrew Jackson Building, 9th Floor
502 Deaderick Street
Nashville, TN 37243

Dear Members of the Tennessee Health Facilities Commission,

I am writing to express my strong opposition to Cedar Recovery's application for

a Certificate of Need to open a methadone clinic at 1805 Burgess Falls Road in Putnam County. While I understand the importance of providing treatment options for those struggling with opioid addiction, I believe that the establishment of a methadone clinic in this particular location will have negative consequences for our community.

Methadone, while an effective treatment for some, carries significant risks. It is a powerful synthetic opioid that can lead to dependence and, in some cases, severe side effects. The drug's potential for misuse and the difficulty many patients face in eventually tapering off methadone can make it a double-edged sword. Additionally, methadone-related overdoses remain a serious concern, especially when it is not administered or monitored correctly.

As residents of Putnam County, we are deeply concerned about the impact this clinic could have on the safety and well-being of our community. The proposed location is near residential neighborhoods and areas where children play and attend school. Introducing a facility of this nature could potentially attract individuals with substance use disorders, increasing the risk of crime and other related issues in our otherwise peaceful and close-knit community.

Our concerns extend beyond just the presence of the clinic. Methadone is often prescribed in increasingly larger quantities as rapport is built between patients and providers. This can lead to the drug being diverted and sold illegally, exacerbating the very problem it is intended to treat. Communities where methadone clinics are established have reported instances of methadone being sold on the streets, contributing to a cycle of addiction and crime that we do not want to see in our home.

We have worked hard to build a safe and supportive environment for our families, and a methadone clinic does not align with the values we hold dear. Instead of enhancing our community, it would likely bring challenges that we are neither equipped nor prepared to handle.

I respectfully urge the Tennessee Health Facilities Commission to consider the concerns of our community and deny Cedar Recovery's application for a Certificate of Need. We are committed to supporting those in need of treatment, but we believe that this location is not appropriate for such a facility. We hope that alternative solutions can be explored that do not compromise the safety and integrity of our community.

Thank you for your attention to this matter.

Sincerely,

Brianna Qualls

Dear Health Facilities Commission Members,

The Cookeville City Council changed zoning rules concerning methadone clinics to avoid a threatened lawsuit by Cedar Recovery, but told their representatives that Cookeville did not need a methadone clinic at this time.

Cedar Recovery then posted a Letter of Intent in the local paper for a location just outside their jurisdiction and literally in sight of the city limits sign.

The Putnam County Commission unanimously passed a resolution opposing the proposed methadone clinic.

There are numerous other “non-methadone” opioid addiction treatment facilities already here.

A Pennsylvania Court recently ruled that a methadone clinic owed no duty to the family of Joseph Cummins who was struck and killed by one of their dosed clients. In February, a recently methadone dosed Seth Andersen was involved in a head-on crash on Harding Place in Davidson County. More than 400 children and their families will be traveling past the clinic’s projected 250 (year 2) daily clients to the new Park View Elementary which is less than 2000’ away.

As residents of Putnam County, my husband and I ask that you deny the Certificate of Need Cedar Recovery has applied for to locate a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee.

Respectfully,

Carol and Lee Carney

Dear All,

I am writing in opposition of Cedar Recovery's request for a certificate of need in Putnam County, TN. As a licensed professional counselor who has worked in substance abuse/misuse, I can not oppose methadone clinics any stronger. Truly, it does not aid someone who is desiring recovery. Rather it turns a person's problem into an opportunity for someone to make a profit by substituting one drug for another.

This clinic wants to open near a youth athletics program on Burgess Falls Road. It is completely inappropriate for a drug that is sold for profit by a doctor to then have an opportunity to be re-sold by someone with an addiction and/or traded for a different drug of choice near youth. The homeschool home office down the street will have families in and out for administrative procedures with their homeschool education. All of these youth are at risk with a DEA schedule II drug being distributed on the same road…a drug that is considered to have a high potential for abuse or misuse. A drug that can get into the hands of our youth and cultivate an unsafe environment for them to lead healthy, drug-free lives.

Methadone should be contained to inpatient use and other highly supervised environments where the future goal is cessation of it and all potentially addictive substances. For profit methadone clinics do NOT have the patient's need as their main priority. Please represent the citizens of Putnam County and deny a certificate of need. We have outpatient treatment facilities that can appropriately address patients battling addictions without giving them a new addiction.

Sincerely,
Daniell Maxwell Carter

Greetings,

I am writing in opposition to the purposed Methadone Clinic in Cookeville Tn.
There are many reasons why so many in our area are opposed to this.

I'm not sure how to rank them so I will just state them in no particular order.

The proposed site is in the same building that houses a sports type complex for our youth
in this area.

There are churches, daycares, and schools near the proposed site. If this was a store selling alcohol or "pub" of any sort it would be immediately rejected
in Putnam County by our local Beer Board.

It is also somewhat residential in nature in its proximity to single stand alone
homes and also subdivisions. To be fair there are commercial facilities near as well.

The building fronts a state highway which is very well traveled and probably too often at speeds
not conducive to the area or this type of operation.

There is a mental institution no more than one half mile from the proposed site.

The proposed site is less than a mile from Interstate 40 which in and of itself
is a major concern.

If treatment is sought by addicts there are many facilities already is place in Cookeville, Putnam County and

surrounding cities and counties that offer treatment by means other than giving a substitute drug.

Cookeville is a "Hub" for the Upper Cumberland area and draws thousands per day.
It will be a draw for those seeking this Legal Drug. It won't be like driving across town
as is the case in larger cities but traveling major, minor, winding, curvy, mountainous,
and narrow roads to get here. Who knows what condition they will be in while they are coming here or leaving here.

There is the very real possibility that some forms of this drug can be sold in the parking lot before
leaving the facility or taken and distributed anywhere. The argument can be made that they at the clinic will
control usage by "on site" supervised ingestion. Maybe so, but in the event, they distribute and let
the user leave the site with product it is no longer controlled.

It is my opinion that Methadone is nothing more than an addictive drug that is legal and
is distributed by legal merchants. Legal drug dealers recruiting clients for long term
clients.

The very definition of Methadone is scary and concerning.

I am a retired Putnam County Sheriff and am very familiar with the devastating effects
illegal drugs impose on our society. I have dealt in the past with a vast array of problems arising
from the trafficking in the drug user world.
Many problems are brought about in my opinion by these clinics.
One particular incident arose many years ago after two people from our area went to a clinic in or near Chattanooga Tn.
When they returned to Cookeville from Chattanooga one of those involved shot the other.
Simply because time has passed, I cannot quote all that was learned from that incident
but do remember those involved were in that situation as a result of their trip to the clinic.

I suppose it is clear that I oppose this clinic being located anywhere in Putnam County.
It does not in any way add to the health and wellbeing of our community and its citizens, in my opinion.
As a former Law Enforcement Officer, I fear this coming to our

community.

I ask you to consider my opinion as well as the many others who have reached out to you in
opposition to this facility. We do not need or want it.

Thank you for your time and consideration.

Sincerely,

David K. Andrews

Sheriff, Retired
County Commissioner, 12th District

Dear Sirs:

I am a resident of Putnam County, Tennessee. I am tremendously concerned about a proposed methadone clinic in my county. I am writing to you as a private citizen urging you to vote against the application for a Certificate of Need submitted by Cedar Recovery for a methadone clinic at 1805 Burgess Falls Road, Cookeville, Tennessee. I request that you add the foregoing letter to the board members' packet for the hearing as to the application.

While I understand that opiate addiction is a problem in our state, I do not believe that a methadone clinic in our county is the proper way to address the issue. Furthermore, the proposed clinic in our area is problematic for a number of reasons, which include but are not limited to the following:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries a Federal Drug Administration warning as a possibly addictive drug.

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

To Whom It May Concern,

I hope this letter finds you well. I am writing to express my deep concern and strong opposition to the proposed establishment of a methadone clinic in our community. While I fully acknowledge the critical role that such clinics play in addressing the opioid crisis and supporting individuals in their recovery journeys, I firmly believe that our community is not the appropriate location for this facility.

Our community is characterized by its family-friendly environment, with numerous daycares, schools, churches, parks, and recreational facilities that serve as hubs for our children and families. The presence of a methadone clinic in close proximity to these areas raises several significant concerns that must be addressed:

1. **Safety and Security**: The introduction of a methadone clinic could attract a high volume of individuals struggling with addiction to our neighborhood. This influx has the potential to increase the risk of drug-related activities, crime, and disturbances, posing a threat to the safety and well-being of our residents, especially our children and elderly.
2. **Impact on Property Values**: Numerous studies have shown that the presence of drug treatment facilities can lead to a decline in property values. Our community members have invested their hard-earned money into their homes, and a decrease in property value would be a significant financial burden for many.
3. **Community Character**: Our community prides itself on its peaceful and cohesive character. The introduction of a methadone clinic could fundamentally alter the fabric of our community, leading to a shift in the demographic and a potential increase in social tensions and stigmatization.
4. **Alternatives and Location Suitability**: It is crucial to consider alternative locations for the methadone clinic that would be better suited to serve those in need without compromising the integrity of a residential neighborhood. Urban centers, medical districts, or areas with existing support infrastructure for addiction recovery would provide a more appropriate setting for such a facility.

I want to emphasize that my opposition is not rooted in a lack of compassion for those struggling with addiction. On the contrary, I fully support efforts to provide comprehensive treatment and rehabilitation services. However, it is essential to balance the needs of those seeking recovery with the legitimate concerns of community residents.

I urge you to reconsider the location of the proposed methadone clinic and explore alternative sites that would be more suitable for this type of facility. Let us work together to find a solution that addresses the needs of all parties involved, ensuring the safety, stability, and continued prosperity of our community.

Thank you for your time and consideration. I look forward to your response and to working collaboratively towards a resolution that benefits everyone.

Sincerely,

J. S. Francis, Sr.

4) The location of the proposed clinic is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office, is within 0.3 miles of a daycare facility, and within 0.5 miles of a middle school.

One of the administrators of Cedar Recovery mentioned in a recent meeting in our county that there is no way to prevent the bathrooms in such a facility becoming a "drop" for patients of the clinic, and that there would be no way to prevent patients selling methadone in the parking lots of such facilities. Further, the administrators of Cedar Recovery stated to an audience at a meeting in our area that they would not locate a facility "where they are not wanted." With this letter, I am informing this board that the methadone clinic proposed by Cedar Recovery is definitely not wanted in our area.

Please note my opposition to this proposed clinic. Again, I urge you to vote against the Certificate of Need for which Cedar Recovery has applied.

Sincerely,

Kimberly Hale

I was planning on attending the July 29th meeting, to speak in opposition of Cedar Recovery. Since the date has been changed, I am now unable to attend...I am giving my 2 minutes of "speak time" to Johnny Mack, who will be in attendance for the August 28, 2024 meeting.

Mr Earhart
I am here to oppose the Cedar Recovery Clinic proposed for the Burgess Falls Rd location in Putnam Co.
First of all it is located next door to a youth sports training facility
It near a daycare
It is near an elementary school
It is proposed by a for profit corporation that will only care for their bottom line. It does not get anyone off of drugs it only moves their addiction to another drug.
I live 1.3 miles from the proposed facility.
Thank you for your time

Hello,
My family and I live in Cookeville Tennessee and we oppose Cedar Recovery's intent to open a Methedone Clinic in Putnam County or anywhere near our county.
Thank you for hearing and helping us keep this drug from being available here.
Thank you,
Teresa Sanders

Re: Citizens' Petitions Opposing Certificate of Need Approval – Cedar Recovery Methadone Clinic at 1805 Burgess Falls Road, Cookeville, TN

Request to This Be Added to the Board Members' Packet

Dear Sirs:

The Concerned Citizens of Putnam County (Citizens for a Drugfree Putnam) was created to oppose the for-profit spread of drug use and addiction over citizens of the Upper Cumberland.

The group actively opposed Cedar Recovery's drive to locate a Methadone Clinic at 1225 South Willow earlier this year; and in May began opposing Cedar Recovery's latest drive to locate a Methadone Clinic at 1805 Burgess Falls Road.

In June, upon invitation from Putnam County leadership, the group began coordinating with county leadership and other citizen groups. Included among the actions Concerned Citizens of Putnam County has undertaken are: hosted public service education meetings and materials, facilitated yard sign campaign to alert citizens, mobilized fellow citizens, coordinated with governmental officials and Faith based recovery groups, and conducted petition drives both paper and online so Putnam County and Upper Cumberland citizens could have a voice in the decision the Health Facilities Commission is about to make.

Petition Totals Summary:

	Petitioners			
Petition Drive	Upper Cumberland Counties	Other TN & US	Total	Petition Summary & Details SEE
Paper	2528	0	2528	Attachment A
Online	2742	593	3335	Attachment B
Total -	5270	593	5863	

On behalf of the thousands of citizens recorded in the attached, we petition the Health Facilities Commission to deny Cedar Recovery's Certificate of Need for a Methadone Clinic at 1805 Burgess Falls Road, Cookeville, Putnam County, TN.

Sincerely,

Concerned Citizen of Putnam County & the Upper Cumberland

cc: Mayor Randy Porter

A Petition Against Cedar Recovery Methadone Clinic Certificate of Need

PAPER PETITION SIGNATURES

A Petition Against Cedar Recovery Methadone Clinic Certificate of Need

We, the undersigned, request that the State of Tennessee Health Facilities Commission **deny** Cedar Recovery's Certificate of Need Application for a nonresidential substitution-based treatment center at 1805 Burgess Falls Road, Cookeville, TN (or any Putnam County location) for the following reasons:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries an FDA warning as a possibly addictive drug and is listed as a DEA schedule II dangerous drug "with a high potential for abuse, with use potentially leading to severe psychological or physical dependence."
2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.
3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.
4) The location is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office in one direction and a daycare in the other, and is within 0.5 miles of a middle school.

A Petition Against Cedar Recovery Methadone Clinic Certificate of Need

We, the undersigned, request that the State of Tennessee Health Facilities Commission **deny** Cedar Recovery's Certificate of Need Application for a nonresidential substitution-based treatment center at 1805 Burgess Falls Road, Cookeville, TN (or any Putnam County location) for the following reasons:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries an FDA warning as a possibly addictive drug and is listed as a DEA schedule II dangerous drug "with a high potential for abuse, with use potentially leading to severe psychological or physical dependence."
2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.
3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.
4) The location is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office in one direction and a daycare in the other, and is within 0.5 miles of a middle school.

A Petition Against Cedar Recovery Methadone Clinic Certificate of Need

We, the undersigned, request that the State of Tennessee Health Facilities Commission **deny** Cedar Recovery's Certificate of Need Application for a nonresidential substitution-based treatment center at 1805 Burgess Falls Road, Cookeville, TN (or any Putnam County location) for the following reasons:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries an FDA warning as a possibly addictive drug and is listed as a DEA schedule II dangerous drug "with a high potential for abuse, with use potentially leading to severe psychological or physical dependence."
2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.
3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.
4) The location is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office in one direction and a daycare in the other, and is within 0.5 miles of a middle school.

A Petition Against Cedar Recovery Methadone Clinic Certificate of Need

We, the undersigned, request that the State of Tennessee Health Facilities Commission **deny** Cedar Recovery's Certificate of Need Application for a nonresidential substitution-based treatment center at 1805 Burgess Falls Road, Cookeville, TN (or any Putnam County location) for the following reasons:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries an FDA warning as a possibly addictive drug and is listed as a DEA schedule II dangerous drug "with a high potential for abuse, with use potentially leading to severe psychological or physical dependence."
2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.
3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.
4) The location is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office in one direction and a daycare in the other, and is within 0.5 miles of a middle school.

A Petition Against Cedar Recovery Methadone Clinic Certificate of Need 1025

We, the undersigned, request that the State of Tennessee Health Facilities Commission **deny** Cedar Recovery's Certificate of Need Application for a nonresidential substitution-based treatment center at 1805 Burgess Falls Road, Cookeville, TN (or any Putnam County location) for the following reasons:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries an FDA warning as a possibly addictive drug and is listed as a DEA schedule II dangerous drug "with a high potential for abuse, with use potentially leading to severe psychological or physical dependence."
2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.
3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.
4) The location is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office in one direction and a daycare in the other, and is within 0.5 miles of a middle school.

A Petition Against Cedar Recovery Methadone Clinic Certificate of Need

We, the undersigned, request that the State of Tennessee Health Facilities Commission **deny** Cedar Recovery's Certificate of Need Application for a nonresidential substitution-based treatment center at 1805 Burgess Falls Road, Cookeville, TN (or any Putnam County location) for the following reasons:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries an FDA warning as a possibly addictive drug and is listed as a DEA schedule II dangerous drug "with a high potential for abuse, with use potentially leading to severe psychological or physical dependence."
2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.
3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.
4) The location is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office in one direction and a daycare in the other, and is within 0.5 miles of a middle school.

A Petition Against Cedar Recovery Methadone Clinic Certificate of Need (40)

We, the undersigned, request that the State of Tennessee Health Facilities Commission **deny** Cedar Recovery's Certificate of Need Application for a nonresidential substitution-based treatment center at 1805 Burgess Falls Road, Cookeville, TN (or any Putnam County location) for the following reasons:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries an FDA warning as a possibly addictive drug and is listed as a DEA schedule II dangerous drug "with a high potential for abuse, with use potentially leading to severe psychological or physical dependence."
2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.
3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.
4) The location is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office in one direction and a daycare in the other, and is within 0.5 miles of a middle school.

A Petition Against Cedar Recovery Methadone Clinic Certificate of Need

We, the undersigned, request that the State of Tennessee Health Facilities Commission **deny** Cedar Recovery's Certificate of Need Application for a nonresidential substitution-based treatment center at 1805 Burgess Falls Road, Cookeville, TN (or any Putnam County location) for the following reasons:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries an FDA warning as a possibly addictive drug and is listed as a DEA schedule II dangerous drug "with a high potential for abuse, with use potentially leading to severe psychological or physical dependence."
2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.
3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.
4) The location is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office in one direction and a daycare in the other, and is within 0.5 miles of a middle school.

A Petition Against Cedar Recovery Methadone Clinic Certificate of Need (6)

We, the undersigned, request that the State of Tennessee Health Facilities Commission **deny** Cedar Recovery's Certificate of Need Application for a nonresidential substitution-based treatment center at 1805 Burgess Falls Road, Cookeville, TN (or any Putnam County location) for the following reasons:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries an FDA warning as a possibly addictive drug and is listed as a DEA schedule II dangerous drug "with a high potential for abuse, with use potentially leading to severe psychological or physical dependence."
2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.
3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.
4) The location is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office in one direction and a daycare in the other, and is within 0.5 miles of a middle school.

A Petition Against Cedar Recovery Methadone Clinic Certificate of Need

We, the undersigned, request that the State of Tennessee Health Facilities Commission **deny** Cedar Recovery's Certificate of Need Application for a nonresidential substitution-based treatment center at 1805 Burgess Falls Road, Cookeville, TN (or any Putnam County location) for the following reasons:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries an FDA warning as a possibly addictive drug and is listed as a DEA schedule II dangerous drug "with a high potential for abuse, with use potentially leading to severe psychological or physical dependence."
2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.
3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.
4) The location is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office in one direction and a daycare in the other, and is within 0.5 miles of a middle school.

A Petition Against Cedar Recovery Methadone Clinic Certificate of Need

We, the undersigned, request that the State of Tennessee Health Facilities Commission **deny** Cedar Recovery's Certificate of Need Application for a nonresidential substitution-based treatment center at 1805 Burgess Falls Road, Cookeville, TN (or any Putnam County location) for the following reasons:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries an FDA warning as a possibly addictive drug and is listed as a DEA schedule II dangerous drug "with a high potential for abuse, with use potentially leading to severe psychological or physical dependence."
2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.
3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.
4) The location is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office in one direction and a daycare in the other, and is within 0.5 miles of a middle school.

DENY Cedar Recovery's Application for a Methadone Clinic in Putnam County TN

Online Petition Drive Summary

Summary: Citizens for Drugfree Putnam (Concerned Citizens of Putnam County) conducted this petition drive from June 20 – August 25, 2024 using Change.org a global Public Benefit Corporation overseen by nonprofit governing board The Change.org Foundation.

Petition Results:

- The online petition allowed surrounding Upper Cumberland counties beyond the reach of local petition volunteers to have their voices heard.
- There were 3,335 total pertition signers which included those from the Upper Cumberland Counties, other Tennessee Counties and other states and countries as the platform is Global.
- A total of 2,742 (82.2%) petition signers were from Upper Cumberland counties and represented 9 of the 12 counties targeted by Cedar Recovery's methadone clinic.
- The original scope for the online petition focused on Putnam County where 1805 Burgess Falls Road site is located. In hind-site, petition's scope should have focused on Cedar Recovery's 12-country market.
- Signers should live in the Upper Cumberland and be at least 18 years of age.

Petition Link: https://chng.it/8sLPBvN7c2

Why this petition matters:

We request that the State of Tennessee Health Facilities Commission DENY Cedar Recovery's Certificate of Need Application for a nonresidential substitution-based treatment center at 1805 Burgess Falls Road, Cookeville, TN (or any Putnam County or Upper Cumberland location) for the following reasons:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries an FDA warning as a possibly addictive drug and is listed as a DEA schedule II dangerous drug "with a high potential for abuse, with use potentially leading to severe psychological or physical dependence."

2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.

3) The Upper Cumberland region has a number of non-substitution-based treatment groups that KNOW our communities AND are actively cooperating to help residents overcome opioid use disorder.

4) The 1805 Burgess Falls, Cookeville location is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office in one direction and a daycare in the other, and is within 0.5 miles of a middle school.

1	June Smith	Livingston	TN	38570	US	6/21/2024	"I am in strong disagreement of this being put in our area. This does not need to happen."
2	Kyle Maynard	San Diego	CA	92115	US	6/21/2024	"This area is where I grew up and a family friend asked me to sign this petition for her and I trust her."
3	Glen e Henley	Baxter	TN	38544	US	6/21/2024	"Say no to drugs"
4	jennifer lafevet	baxter	TN	38544	US	6/21/2024	"I don't like how they make them take all day dose at one time and then put them on the street. They fall asleep driving. I have family I care about driving through there everyday."
5	Melissa Robertson	Cookeville		38506	US	6/21/2024	"I seen so many in addiction from This drug is horrible and addictive and they also sell the pills for an income on the street. It is a legal high and it is wrong. The side effects physically and mentally from this is irreversible m. It is the hardest drug to withdraw from but it can be done . There are many treatment options without drugs that can and does keep an addict in addiction."
6	Amanda Ledbetter	Cookeville	TN	38506	US	6/21/2024	"Putnam County does not need this. Methadone is abused and even sold (by those prescribed it) to get money for other drugs. This will be a dangerous addition to our county for the citizens that travel the roads here."
7	T S Jackson	Chattanooga	TN	37419	US	6/21/2024	"Say no to drugs!"
8	Catherine Wilkerson	Cookeville	TN	38506	US	6/21/2024	"This proposed meth clinic is in a residential area. This will create issues by have addicts from 12 counties coming and going daily. I fear for my safety and the safety of others in this community. You cannot rationalize with a person on drugs."
9	Anita Peek	Cookeville	TN	38501	US	6/21/2024	"For the safety of ppl living in that area it's a residential area… take it back to the city.. by the Hospital.. or vote no all together take it to another county."
10	Tanner Garrett	Cookeville	TN	38501	US	6/21/2024	"Mt family and kids travel this road daily. Being within a 1/4 mile from a church is also ridiculous."
11	Dianne Peterson	Cookeville	TN	38506	US	6/21/2024	"The facility chosen will be a terrible location for the methadone clinic. The clinic being built will support 11 surrounding counties and the road infrastructure will not be able to support the traffic that will ensue from it. Also placing it near a daycare center and church is not a good idea either. It will be an attraction to more drug abusers. It needs to be placed in town where there are medical facilities and police that can be there to control the issues that arise from this type health care."

12	John Nash	Cadiz	KY	42211	US	6/22/2024	"I have a business located at 1767 burgess falls rd and another at 2139 burgess falls rd. I also have a residence within the business at 1767 Burgess Falls Rd. My adult children as well as my grandchildren visit there frequently. Many of our customers are women, women with children and or elderly persons that come and go at all hours. The safety of my family and our customers is primary! The potential problems of increased drug related crime on my customers and my property is also of great concern! Finally the loss of property values all around would be a significant blow to all area property owners! There are churches, schools, daycares all very nearby as well as hundreds of homes many with children, retired persons, families all within a few minutes walk of the location planned. South willow ave and Burgess falls road are both currently inadequate for the current levels of traffic and the known traffic hazards associated with methadone clinics will add to hazards, accidents and potential injuries. Finally consider the added cost to police the area once the area becomes known and occupied by persons using or coming with users through our peaceful community."
13	Deborah Tayes	Sparta		38583	US	6/22/2024	"Deborah Tayes"
14	Tish Seidler	Rochester	NY	14624	US	6/22/2024	"I know people need help with drugs We love our small community and want it to remain simple and clean. No clinic here please."
15	PHILLIP AMERICANS. FIRST HARRIS Harris	Cookeville	TN	38501	US	6/22/2024	"Our children,Elders,working Community cannot stand for this to come to our county in any form,We have a big drug problem in our Community today even in our Jail, please stop this our County will never be the same."
16	Dotty Pitman	Sparta	TN	38583	US	6/22/2024	"We definitely don't want this in our community or surrounding communities or state of Tennessee."
17	Yvonne Donahue	Cookeville	TN	38501	US	6/23/2024	"I do not need this in my, neighborhood. Quite a few of us are seniors and we do not need to be locked up in our houses. The drugs and used needles are a danger to all of us"
18	Angie Bamford	Pleasant shade	TN	37145	US	6/24/2024	"I really hate to see this coming to my small hometown off of burgess falls road. I have family that lives there with small kids and hate to see it turn into this"
19	Bruce Bailey	Salem	OR	97304	US	6/24/2024	"Using drugs to stop the use of other drugs is not the answer to rampant drug abuse."

20	kim kirby	cookeville	TN	38506	US	6/24/2024	"As a resident of Putnam county I want to express my opposition to the proposed Methadone clinic on the Burgess Falls road. These for profit opioid drug clinics do not help drug addicts or the communities they peddle their addictive drugs. Cookeville, Putnam county and the entire state of Tennessee has no place for these pharmaceutical drug dealers. Instead of helping addicts to break their addiction they simply offer a pharmaceutical legal substitute that addicts continue to suffer under. They profit and push highly addictive drugs and create new addicts. Instead of helping people get off of drugs they add to the user's list of drug options. They are evil drugs dealers and no different than the dealers pushing cocaine, meth, pot, fentanyl, oxyi, etc. It is bad enough we have doctors who prescribe this poison, but to set up an entire 5+ million facility to peddle life long addicive drugs and draw in addicts from across the state is not something we need in our community. Setting right off of I40 is only going to bring in drug trafficking transits and increase drug dealing to our community. My home is less than a mile of this proposed methadone drug dealer facility. I have lived and paid taxes in Putnam county for the past 20 years. Somehow the city zoning council found a way to change the zoning laws and push this trash right on their city limit boundaries. So instead of doing their job to keep our community prosperous and safe, they side with drug dealers and push this trash onto the county residents. Did the city zoning community get a kick back or benefit in any way to help create a loop hole? Are these zoning members even from this area or are they communists transfers trying to tear down our community? I find their actions shady and disgusting. This addictive drug dealing facility is right in the middle of Prescott elementary and middle school, Daniel 1 homeschooling, daycares, multiple family sub divisions, and right in the middle of our tourist area. This will be the first thing people will see driving to our tourist areas in the community. Property values will plummet and crime will grow were it currently does not exists. People live in Putnam County because it is not too big of a city and not to small. We love our clean, low crime, family friendly community. This Methadone clinic is something I have witnessed in Portland, Detroit, Chicago, Denver, Seattle or San Francisco. These places have nothing but evil industries in place to condone and enable homelessness, drug addiction and mental illness. Many communists states like California, Illinois, Michigan, Washington and Oregon are collapsing due to these type of self destructive evil drug dealers conning the local community that they are "here to help". Methadone clinics are a community cancer. We already have addiction facilities available to addicts who need help. Places they can go get off of drugs rather than keep them addicted."

21	Cindi Thompson	cookeville	TN	38501	US	6/25/2024	"Things will just get worse for our county"
22	Linda Minnear	Cookeville		38501	US	6/25/2024	"We have adequate drs and facilities to treat patients that are in recovery from being an addict."
23	lisa phy	cookeville	TN	38506	US	6/25/2024	"it is too close to homes."
24	Sarah Watts				US	6/25/2024	"Burgess Falls Road is already congested especially from Winston Drive up Wiilow to the Post Office area. This will increase in more traffic to this area, along with impaired drivers. Alot of elderly people live in this area. We also have the problems associated with drug activity and the homeless at Star Motar Inn. Prior to the tornado several years ago, homeless were sleeping in yhe gazebos at the Willow Ave COC. I feel a clinic in the area would bring even more homeless into the area. Methadone and Suboxene are just substitute drugs. They are sold, misused, often melted and injected. I do not want this where I live. We need a very strict and tightly ran drug rehab instead of this."
25	Thomas Diaz	Cookeville	TN	38501	US	6/25/2024	"We do not want this ineffective, mess that draws problems to our community instead of solutions. This is a money grab by the builder rather than a step toward solutions for those with addictions"
26	Rachel Williams	Cookeville	TN	38501	US	6/25/2024	"I've been a RN for 15 years and I've never once seen methadone tapered down for a patient in a MAT program. Methadone is a money grab that is not used appropriately."
27	Shannon Warren	Cookeville	TN	38501	US	6/25/2024	"Cause I do not want that in my town."
28	Alice Young	Cookeville	TN	38501	US	6/25/2024	"Alice Young"
29	Brandy Hodge	Cookeville	TN	38501	US	6/25/2024	"Back in 2012 I started going to a methdone clinic in Florida. Prior to this I struggled with addiction to pain medication and was told methadone would make me better. It DID NOT make me better! It made me worse!! I received 3 DUI's while on it, lost custody of my son at that time being, was shoplifting and arrest. And I would tell the clinic I wanted to start weaning off of methadone and was told NO! So after 6 years of being on it I finally got myself into rehab, it was probably the worst detox ever! I wouldn't recommend it to anyone truly trying to get clean and sober."

32	tracy shenton	Cookeville	TN	38506	US	6/25/2024	"This is literally right next to my home. Our neighborhood is a safe one with lots of children and we do not want potentially dangerous people and criminal activity here."
33	Chase Jordan	Cookeville	TN	38506	US	6/25/2024	"I've never understood the idea of treating an addiction by creating a dependency on an approved prescription drug. As I've worked with patients in my field who have struggled with addiction or have family who struggles these clinics rarely every produce a positive change. Most individuals I've encountered receive their prescription but will continue using illegal drugs at the same time. They create a dependency on Methadone and rarely are enrolled for meaningful change like a tapering schedule. These individuals return routinely to pick up their prescription just like that of an individual going to the pharmacy for blood pressure medication. I agree these individuals do need help, but not this way. Developing this clinic would not treat but medicate a smaller population sacrificing the safety of the larger population in the surrounding business, neighborhoods and area."
34	Amber Whitson	Cookeville	TN	38501	US	6/25/2024	"The proposed location of this clinic is located near multiple schools and businesses that work with children. I HAVE WITNESSED first hand what addicts bring to the community. Increasing this type of traffic to this area is not a positive change for our community, but the opposite. We do not want our children exposed to more crime, drugs, or violence, that is proven to follow this type of facility. I also don't understand why a company that has had so much backlash and concerns expressed from the community wants to locate here. It is obvious that the people that live here do not want this. Money hungry is the only explanation. There is already a local drug and mental health treatment facility located here that treats the real causes of addiction. This proposed clinic not a need or a want in our community. IF this company is looking to actually help, the location this company is looking at does not make sense."
35	Kimberly Maytum	Kissimmee	FL	34746	US	6/25/2024	"This would be in my mom's back yard! Does not belong there near churches, schools, daycare. No NO NO!!!!!"

36	Chelsea Goff	Kingsport	TN	37660	US	6/25/2024	"I have two small children that go to a daycare right down the road from where this methadone clinic trying to go. This is not right and very concerning. My family also has a baseball/softball building next door. There is children from all ages in this area. As a parent this is a big fear of this happening right close to so many we love and care for. This is a very busy main road too where people travel to town and drop children off at their school or activities."
37	John Willis	Cookeville	TN	38506	US	6/25/2024	"Aiding addictions do not help cure the addictions!"
38	Alisa McBroom	Baxter	TN	38544	US	6/25/2024	"I live in this area .I don't want it destroyed by the Methadone Clinic and we don't need this in our neighborhood."
39	B C	Cookeville	TN	38501	US	6/25/2024	"WE DONT WANT THIS HERE!!!!"
40	Rick Jones	Cookeville	TN	38501	US	6/25/2024	"It's all about commerce and does not have a positive impact on the problem. We have enough greed without adding another layer to the community. WWJD?"
41	Noah McKay	Cookeville	TN	38501	US	6/25/2024	"Absolutely NOT in the Upper Cumberland"
42	Frances Jones	Cookeville	TN	38501	US	6/25/2024	"I oppose this clinic in this area."
43	Jack Gill	Cookeville	TN	38501	US	6/25/2024	"This is the for-profit business Cedar Recovery's third attempt to locate a Methadone Clinic, which treats citizens addicted to drugs with other addictive drug(s), in/near Putnam County. We are FOR the complete and drug-free cure for our fellow citizens without the continued damage to their health; without the collateral consequences from Methadone treatment to families, other citizens and our communities; and without the threat of potential venture capitalists perpetually profiting off the backs of our fellow citizens."
44	sheila church	Cookeville	TN	37066	US	6/25/2024	"Kids should and always will be the #1 priority!"
45	Terri Farley	Cookeville	TN	38506	US	6/25/2024	"Methadone is bad! Believe me, I've had several family members on the program (our town had a clinic). None of them got clean. They were then addicted to the methadone and when they couldn't have it, they found something else. It has terrible withdraw symptoms, just like the stuff they are trying to come off of. NO, NO, NO!!!!!!!!"
46	Sandra Lee	Cookeville		38501	US	6/26/2024	"Sign the petition! No Methadone Clinic in Cookeville!"
47	Mark Bain	Cookeville	TN	38501	US	6/26/2024	"I don't want this in my town."

48	Todd McManaway	Franklin	KY	42134	US	6/26/2024	"Psalms 34:18 The Lord is close to the brokenhearted,he RESCUES those who spirits are crushed.... No clinic is going to help this matter of addiction,there not a solution..Just trading one drug for the government's version of a solution..Put monet in sober living housing that is Christ based,Jesus paved a path for true healing for people that have tried everything to mask the pain of some type of trauma..I know cause I've lived it and nothing ever worked until God met me where I was at and delivered me from the life of chasing the dark fruits of this world.Isaiah 9:6 For too us a son is born,who will take the goverment on his shoulders,HE will be called wonderful counselor,mighty God,everlasting Father,and Prince of Peace....,,,Those are facts,"
49	Sandy Kilgore	Bakewell		37304	US	6/26/2024	"I have lived in Putnam County my whole life 64 years. I've seen a b lot of growth. Unfortunately more crime here now than ever. I feel this institution would increase our crime rate & our expenses. I don't feel this is what we want here in Putnam County"
50	Lindsay Tuvell	Cookeville	TN	38506	US	6/26/2024	"This is a horrible location for this, and our children need a safe place to live. Please put somewhere else!"
51	Sherri Stone	Cookeville	TN	38506	US	6/26/2024	"We do not need increase drug activity, crime or violence in our area. Studies show that is exactly what happens in the communities around these clinics We have better options available for those seeking help and freedom from addiction."
52	barbara bartle	silver point	TN	38582	US	6/27/2024	"There’s better proven options for recovery than methadone."
53	Ed Gardner	Monroe county	NY	14603	US	6/27/2024	"As a police officer of 37 years who had a methadone clinic in my jurisdiction where I worked for 24 years, I see the direct effects of the types of people that move to the area and commit crimes."
54	Samantha Davis	Knoxville	TN	37922	US	6/28/2024	"This shouldn't be a location for this type of place"
55	Kimberly Webb	Cookeville	TN	38502	US	6/28/2024	"WE DON'T THIS RUGHT OFF A MAIN OR LESS THAN 2 MILES FROM SCHOOLS"
56	Emily Carmack	Sparta	TN	38583	US	6/28/2024	"I am a small business owner in Cookeville for over 40 years. I cannot believe that any one would think that giving an addict another narcotic to get them off the one they are addicted to is crazy and has been proven to not work. How safe will our children be ? The clinic is very close to the new school."

57	Dawn White	Cookeville	TN	38506	US	6/28/2024	"This space is not only DIRECTLY beside a business for kids, it is within a short walking distance to a new elementary school, within .5 mile of an industrial park (which will certainly effect the decisions of manufacturers coming in), and way too close to several housing developments. There are plenty of alternatives in the area to support addicts needing (nonaddictive) help. This is NOT the right location for such a facility."
58	Linda Cooper	Baxter	TN	38544	US	6/28/2024	"Linda cooper"
59	Jo Upegui	Rancho Palos Verdes	CA	90275	US	6/28/2024	"Please do not bring this to Putnam County! Too close to my family and grandkids!"
60	Kevin Pieper				US	6/29/2024	"My children go to the daycare closely to this place. I also have a daughter and multiple close friends that have children training at the 931 elite building."
61	Brian Jernigan	Cookeville	TN	38501	US	6/30/2024	"Brian Jernigan"
62	jennifer butler	Cookeville	TN	38501	US	7/1/2024	"Methionine is legal synthetic meth. Stay out of our community."
63	Randy Herron	Cookeville	TN	38506	US	7/1/2024	"Not in our front yard!"
64	Victoria Young	Cookeville	TN	38506	US	7/4/2024	"This is the not what Cookeville should be known."
65	Franklin Martin	Atlanta	GA	30301	US	7/4/2024	"This drug makes them just as addicted the only difference is this one is legal! Not in my backyard"
66	Kristal Scott	Baxter	TN	38544	US	7/5/2024	"We don't need this in our county. More traffic more crime. And its just one drug for another. Just legally."
67	Jacqueline Shoulders	Wesley Chapel	FL	33545	US	7/5/2024	"The proposed Methadone Clinic is near my subdivision which consists of mostly retired elderly people. I think it would be a safety issue as well as lower our property value. No Clinic in Putnam Co."
68	Reanna Moore	Franklin	TN	37405	US	7/7/2024	"My hometown does not need this type of clinic which aligns to advice from HCPs in this medical specialty. The proposed proximity of the clinic to daycares, schools and other youth programs is dangerous."
69	Sherry Smith	Cookeville	TN	38570	US	7/8/2024	"Methodone is just another drug replacing another drug.We need more rehabiltation centers to help get off drugs instead of this"
70	Darrell Partin	Cookeville	TN	38501	US	7/8/2024	"This clinic is a terrible idea for our community."
71	Danica Cobb	Rickman	TN	38580	US	7/10/2024	"Please sign!! We don’t need this so close to our kids!"
72	Perigon Service				US	7/12/2024	"https://nashvilletnnewssource.com/opioid-treatment-program-facing-opposition-in-putnam-county/"
73	Donald wleklinski	Terre Haute	IN	47803	US	7/13/2024	"Needs attention."

74	Michael Schartz	Modesto	CA	95355	US	7/13/2024	"I live in California methadone clinics are everywhere so we're heroin addicts and meth, addicts and Coke attics and fentanyl, attics and every other kind of opioid drug from big Pharma companies maybe get rid of the clinics you'll get rid of the drug attic's"
75	Penny Gentry	Cookeville	TN	38501	US	7/14/2024	"I'm a mom and I'm a gramma.....I don't want this clinic, which only shifts from one addictive narcotic to another, Anywhere Near my kids and grands. Talk about a safety issue....my goodness! You say you want communities to remain safe for everyone, and yet This is up for a vote.....This, which can and will attract those who want to lure our kids and grands into the very drugs and addictions we're working so hard to protect them from?!!!! I had a cousin who was lured in to the drug scene....please notice the past tense verb here. That's because he isn't here anymore to speak up because he died from an overdose. And...NO...getting him adddicted to another narcotic Would Not have helped him! NO! Please deny permission for Cedar Recovery, LLC to set up shop here in Putnam County. I don't want them in my front yard, or my back yard, or my side yards, or on my road, or in my town or county....NO!"
76	john Davidson	Gainesboro	TN	38562	US	7/16/2024	"We dont need it!"
77	Ashley Lawson	Cleveland	TN	37312	US	7/16/2024	"We don't need methadone clinics in America. We don't need another way for addicts to get drugs. We don't need to keep supporting the crisis that is killing our loved ones."
78	Rebecca Henley	Cookeville	TN	38506	US	7/18/2024	"Don't want it around our family children, daycare,or at all Thank you!"
79	Debbie LaPint	Cookeville	TN	38501	US	7/18/2024	"It's not reliable help. They need treatment and to get off the stuff."
80	Ashley Anderson	Cookeville	TN	38506	US	7/18/2024	"I've lived in Putnam county most my life it's my favorite place and bringing a Methodone Clinic here is just heartbreaking and scary. This county is very close pretty safe. If we bring a methodone clinic here I feel like it will bring a lot of problems. Methodone is so addictive that being a recovering addict for years I know what come with addiction. The brain on drugs doesn't think rationally. I fear for the community."
81	Corrine Garrison	Cookeville	TN	38501	US	7/18/2024	"We have a big enough drug problem in Putnam County...we do not need a place that encourages drug users to come here."

82	Janan Johnston	West Milford	NJ	7480	US	7/20/2024	"These types of clinics should be near or in a hospital, not a residential area close to children (daycare/preschool), and people's homes where they are to feel safe. You are posing danger where it is unwanted. Take your poison elsewhere."
83	Cj Bennett	Cookeville	TN	38506	US	7/21/2024	"Putnam County (and Specifically Burgess Falls Rd) CANNOT handle the traffic that will bring. There's accidents EVERYDAY on Burgess Falls Rd...now you want Drug Addicts driving that road!?! Besides that there are a LOT of homes of elderly, families with small children, and 2 day care's within 1 mile of where they want to put this clinic. It has been well PROVEN that these Methadone Clinics DO NOT WORK...the long term side effects out weigh the bandaid on the huge wound! It will bring more CRIME to our area (& state!) And it will LOWER the values of our homes in the area! THIS IS THE MOST STUPIDEST IDEA our State has come up with!! AND WE MUST NOT LET THIS HAPPEN!!! (Sounds to much like another DemonRat Money Grab tactic!)... It must be stopped. Send Letters to Gov. Bill Lee and Marsha Blackburn."
84	Christine Eddins	Sylva	NC	28779	US	7/25/2024	"This is not the way to cure addiction. This only enables addiction and causes more issues in the long run."
85	Rhonda Bryant	Cookeville	TN	38506	US	7/25/2024	"This is just inviting more trouble to a small community. Take it to Lebanon, Mt Juliet or Hendersonville!"
86	Amanda Ledbetter	Cookeville	TN	38506	US	7/25/2024	"If you want to fight drugs in our community, this place must be stopped! Methadone is no more than a legal way to sell more drugs. Narcotic addiction treatment should not include switching one drug for another. Many people sell their prescription of methadone to purchase their illegal drug of choice."
87	Amanda Ledbetter	Cookeville	TN	38506	US	7/25/2024	"If you want to fight drugs in our community, this place must be stopped! Methadone is no more than a legal way to sell more drugs. Narcotic addiction treatment should not include switching one drug for another. Many people sell their prescription of methadone to purchase their illegal drug of choice."
88	Tanya Ward	Cookeville	TN	38506	US	7/31/2024	"It does not work"
89	John Olsen	Knoxville	TN	37924	US	8/12/2024	"Will only increase addiction issues and crime in area"
90	Don Frazier	Columbus	TN	47201	US	8/12/2024	"It has no business there."
91	Lisa Geer	Cookeville	TN	38506	US	8/13/2024	"Lisa Geer"
92	Charity Zoodsma	Cookeville	TN	38501	US	8/18/2024	"We do not want this clinic in our community."

A Petition Against Cedar Recovery Methadone Clinic Certificate of Need

We, the undersigned, request that the State of Tennessee Health Facilities Commission **deny** Cedar Recovery's Certificate of Need Application for a nonresidential substitution-based treatment center at 1805 Burgess Falls Road, Cookeville, TN (or any Putnam County location) for the following reasons:

1) Methadone has been linked in medical studies to brain tissue damage that can cause learning and problem-solving issues, slower thinking, problems walking, balance troubles, abnormal heart rhythms, and respiratory problems. Methadone carries an FDA warning as a possibly addictive drug and is listed as a DEA schedule II dangerous drug "with a high potential for abuse, with use potentially leading to severe psychological or physical dependence."
2) Venture capital investors view methadone clinics as highly profitable takeover targets, creating the potential to lose local control of the clinic.
3) The Upper Cumberland region has a number of non-substitution-based treatment groups that know our communities and are actively cooperating to help residents overcome opioid use disorder.
4) The location is in the same building as a youth sports training facility, is within 0.2 miles of a homeschool umbrella office in one direction and a daycare in the other, and is within 0.5 miles of a middle school.
